

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Post Marketing Surveillance (PMS) Study for Cibinqo Tablet (Abrocitinib) in Patients With Moderate to Severe Atopic Dermatitis (AD) in Korea
Short Title:	A Study to Learn About the Study Medicine (Called Cibinqo) in People With Atopic Dermatitis
Protocol Number:	543374351616705412
NCT Number:	NCT05391061
Sponsor Name:	Pfizer
Investigational Product:	abrocitinib
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with Adverse Events (AE's) according to frequency 2. Number of participants with Adverse Drug Reactions (ADR's) according to frequency 3. Number of participants with unexpected AE's according to frequency
Secondary Obj.:	1. Proportion of participants achieving the Investigator's Global Assessment (IGA) score of clear (0) or almost clear (1) (on a 5-point scale) and a reduction from baseline of ≥ 2 points 2. Proportion of Participants Achieving Eczema Area and Severity Index (EASI) Response of ≥ 75 Percent (%) Improvement From Baseline 3. Proportion of Participants Achieving ≥ 4 Points improvement in the severity of Pruritus Numerical Rating Scale (NRS) from baseline

2.2 Background & Rationale

The purpose of this non-interventional study is to learn about the safety and effectiveness of Cibinqo Tablet for the possible treatment of atopic dermatitis (AD).

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	1100

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

1. Patients with moderate to severe AD who have been determined to start treatment with Cibinqo Tablet according to the approved indications of the medicinal product.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

? Atopic Dermatitis Cibinqo Tablet is indicated for the treatment of patients 12 years of age and older with moderate-to-severe atopic dermatitis who have required systemic therapies.

2. Evidence of a personally signed and dated informed consent document indicating that the patient or their parent(s)/legal guardian, if applicable, have been informed of all pertinent aspects of the study

4.2 Exclusion Criteria

1. Patients who have previously received Cibinqo Tablet
2. Patients concurrently participating in other studies involving therapeutic interventions and/or investigational products
3. Patients who have contraindications to Cibinqo Tablet as specified in the approved LPD ? Contraindications to Cibinqo Tablet

* Patients with platelet count $<150 \times 10^3/\text{mm}^3$, an absolute neutrophil count (ANC) $<1 \times 10^3/\text{mm}^3$, an absolute lymphocyte count (ALC) $<0.5 \times 10^3/\text{mm}^3$ or who have a haemoglobin value $<8 \text{ g/dL}$

* Hypersensitivity to the active substance or to any of the excipients

* Active serious systemic infections, including tuberculosis(TB)

* Severe hepatic impairment

* Pregnancy and breast-feeding

* Patients with rare hereditary problems of galactose intolerance, total lactase deficiency or glucose-galactose malabsorption

11. Study Identifiers & Governance

Primary ID: 543374351616705412

Registry Number: NCT05391061

Sponsor: Pfizer

Study Title: A Study to Learn About the Study Medicine (Called Cibinqo) in People With Atopic Dermatitis
