

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1 Clinical Study in Healthy Females of Nonchildbearing Potential to Compare the Pharmacokinetics of Sotatercept (MK-7962) Administered as a Liquid Formulation in an Autoinjector Versus the Lyophilized Formulation
Short Title:	A Study of Sotatercept (MK-7962) in Healthy Females Administered as a Liquid Formulation in an Autoinjector Versus the Lyophilized Formulation (MK-7962-027)
Protocol Number:	643150724159281484
NCT Number:	NCT06930664
Sponsor Name:	Merck
Investigational Product:	Sotatercept
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Area Under the Concentration-time Curve from Time 0 Extrapolated to Infinity (AUC0-inf) of Sotatercept at High Dose: Blood samples will be collected to determine the AUC0-inf of sotatercept in plasma. 2. Area Under the Concentration-Time Curve from Time 0 to the Time of the Last Quantifiable Concentration (AUC0-last) of Sotatercept at High Dose: Blood samples will be collected to determine the AUC0-last of sotatercept in plasma. 3. Maximum Observed Concentration (Cmax) of Sotatercept at High Dose: Blood samples will be collected to determine the Cmax of sotatercept in plasma.
Secondary Obj.:	1. Time of the Maximum Observed Concentration (Tmax) of Sotatercept High Dose 2. Apparent Terminal Elimination Half-Life (t1/2) of Sotatercept at High Dose 3. Apparent Total Plasma Clearance (CL/F) of Sotatercept at High Dose

2.2 Background & Rationale

The goal of the study is to learn what happens to different forms of sotatercept medications in a healthy person's body over time. Researchers want to know if there is a difference in the healthy person's body when different forms of sotatercept medications are given.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: ACTIVE_NOT_RECRUITING
Target N:	146

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

The key inclusion criteria include but are not limited to the following:

- * Is in good health before randomization
- * Has a body weight between 75 and 100 kg, inclusive
- * Is assigned female sex at birth and is a participant of nonchildbearing potential (PONCBP) defined as one of the following:
 - * Premenarchal
 - * Premenopausal with documented hysterectomy and/or bilateral salpingectomy
 - * Postmenopausal
 - * Medical cause of permanent infertility (eg, Müllerian agenesis, androgen insensitivity)

4.2 Exclusion Criteria

The key exclusion criteria include but are not limited to the following:

- * Has a history of opportunistic infection (eg, invasive candidiasis or pneumocystis pneumonia)
- * Has had a serious local infection (eg, cellulitis, abscess) or systemic infection (eg, septicemia) within 3 months prior to screening

11. Study Identifiers & Governance

Primary ID:	643150724159281484
Registry Number:	NCT06930664
Sponsor:	Merck
Study Title:	A Study of Sotatercept (MK-7962) in Healthy Females Administered as a Liquid Formulation in an Autoinjector Versus the Lyophilized Formulation (MK-7962-027)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
