

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A PHASE 1, OPEN-LABEL, DOSE ESCALATION AND DOSE EXPANSION STUDY TO EVALUATE THE SAFETY, TOLERABILITY, PHARMACOKINETICS, AND ANTI TUMOR ACTIVITY OF PF-07799933 (ARRY-440) AS A SINGLE AGENT AND IN COMBINATION THERAPY IN PARTICIPANTS 16 YEARS AND OLDER WITH ADVANCED SOLID TUMORS WITH BRAF ALTERATIONS
Short Title:	A Study to Learn About the Study Medicine Called PF-07799933 in People With Advanced Solid Tumors With BRAF Alterations.
Protocol Number:	684924083705972343
NCT Number:	NCT05355701
Sponsor Name:	Pfizer
Investigational Product:	cetuximab
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with dose limiting toxicities (DLTs) (Part 1 and Part 2): DLTs will be evaluated during the first cycle (21 days) as both a single agent or in combination with binimetinib or cetuximab 2. Number of participants with treatment-emergent adverse events (AEs) (Part 1 and Part 2): AEs as characterized by type, frequency, severity, timing, seriousness, and relationship to study therapy 3. Number of participants with clinically significant change from baseline in laboratory abnormalities (Part 1 and Part 2): Laboratory abnormalities as characterized by type, frequency, severity, and timing
Secondary Obj.:	1. Part 1 and Part 2: ORR 2. Part 1/2/3: Intracranial response 3. Part 1 and Part 2: Duration of response

2.2 Background & Rationale

The purpose of this clinical trial is to learn about the safety and effects of the study medicine (called PF-07799933) administered as a single agent and in combination with other study medicines (called binimetinib) in people with solid tumors.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING
Target N:	156

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

- * Diagnosis of advanced/metastatic solid tumor including primary brain tumor.
- * Qualifying BRAF alteration (V600 or non-V600 Class II/Class III BRAF alteration), in tumor tissue and/or blood (ie circulating tumor deoxyribonucleic acid \[DNA\], or ctDNA).
- * Disease progressed during/following last prior treatment and no satisfactory alternative treatment options (Part 1 and Part 2).
- * Tumor specific cohorts (melanoma, colorectal cancer) must have received specific prior approved therapies

4.2 Exclusion Criteria

- * Brain metastasis larger than 4 cm
- * Systemic anti-cancer therapy or small molecule therapeutics ongoing at the start of study treatment.
- * For participants who may get binimetinib on study, history or current evidence of retinal vein occlusion (RVO) or concurrent neuromuscular disorder associated with elevated creatine kinase (CK)

11. Study Identifiers & Governance

Primary ID: 684924083705972343

Registry Number: NCT05355701

Sponsor: Pfizer

Study Title: A Study to Learn About the Study Medicine Called PF-07799933 in People With Advanced Solid Tumors With BRAF Alterations.

15. Sign-off & Approval
