

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Non-interventional Study for Kisqali (Ribociclib) in Combination With an Aromatase Inhibitor for Adjuvant Treatment in Patients With HR+/HER2- Early Breast Cancer at High Risk of Recurrence to Evaluate Real-world Effectiveness, Safety Profile, Patient Compliance and Quality of Life
Short Title:	A Non-interventional Study for Kisqali (Ribociclib) in Combination With an Aromatase Inhibitor for Adjuvant Treatment in Patients With HR+/HER2- Early Breast Cancer at High Risk of Recurrence
Protocol Number:	733112565215622474
NCT Number:	NCT06830720
Sponsor Name:	Novartis
Investigational Product:	abemaciclib
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Invasive disease-free survival (iDFS) for adjuvant therapy with ribociclib + AI ± LHRH in participants with HR+/HER2- eBC at high risk of recurrence: iDFS using STEEP (Standardized Definitions for Efficacy Endpoints in Adjuvant Breast Cancer Trials) criteria, as assessed by the investigator. iDFS is defined as the time from study start to the date of the first event of invasive ipsilateral breast tumor recurrence, local/regional invasive recurrence, distant recurrence, death (any cause), contralateral invasive BC, or second primary non-breast invasive cancer (excluding basal and squamous cell carcinomas of the skin).
Secondary Obj.:	1. Number of participants per Baseline parameters 2. Reasons for treatment decision by treating physician 3. Patients' individual perception of risk of recurrence and treatment decision

2.2 Background & Rationale

This non-interventional observational study evaluates the real-world effectiveness and safety profile of ribociclib in combination with an aromatase inhibitor for adjuvant treatment in patients with HR+/HER2- early breast cancer at high risk of recurrence, as well as patient compliance and quality of life.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	3250

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Histological diagnosis of HR+/HER2- early breast cancer with curative intent
- * Patients must have an indication for a treatment with ribociclib + AI $\pm$ LHRH as described in the current SmPC/"Fachinformation" of ribociclib (to be included into the cohorts of ribociclib + AI $\pm$ LHRH and ET mono $\pm$ LHRH) or abemaciclib + ET $\pm$ LHRH as described in the current SmPC/"Fachinformation" of abemaciclib (to be included into the abemaciclib + ET $\pm$ LHRH cohort) in the adjuvant setting
- * Before enrollment the treating physician has made the decision in accordance with the patient to treat the patient with either
 - * ribociclib + AI $\pm$ LHRH, or
 - * ET mono $\pm$ LHRH, or
 - * abemaciclib + ET $\pm$ LHRH and baseline is no longer than 2 weeks (14 days) prior to written informed consent for this study.

Baseline = for ribociclib + AI $\pm$ LHRH cohort: date of therapy start; for abemaciclib + ET $\pm$ LHRH cohort: date of therapy start; for ET mono $\pm$ LHRH cohort: within 4 weeks after therapy start or within 4 weeks after last non-endocrine based therapy, whichever is last.

- * $\geq$ 18 years of age
- * Written informed consent

4.2 Exclusion Criteria

\- Patient is simultaneously participating in any investigational trial or simultaneously participating in another Novartis-sponsored non-interventional study with ribociclib.

11. Study Identifiers & Governance

Primary ID:	733112565215622474
Registry Number:	NCT06830720
Sponsor:	Novartis
Study Title:	A Non-interventional Study for Kisqali (Ribociclib) in Combination With an Aromatase Inhibitor for Adjuvant Treatment in Patients With HR+/HER2- Early Breast Cancer at High Risk of Recurrence

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
