

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A PHASE 1 OPEN-LABEL PHARMACOKINETICS STUDY OF PALBOCICLIB, A CYCLIN-DEPENDENT KINASE 4 AND 6 (CDK4/6) INHIBITOR, IN POSTMENOPAUSAL CHINESE WOMEN WITH ER (+), HER2 (-) ADVANCED BREAST CANCER
Short Title:	Palbociclib Pharmacokinetics Study In Postmenopausal Chinese Women With ER (+), HER2 (-) Advanced Breast Cancer
Protocol Number:	855793302196989965
NCT Number:	NCT02499146
Sponsor Name:	Pfizer
Investigational Product:	letrozole
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Single-dose Pharmacokinetics (PK): Maximum Plasma Concentration (Cmax) for Palbociclib: Cmax of palbociclib in the single-dose part (lead-in phase) was observed directly from data. 2. Single-dose PK: Time to Reach Maximum Plasma Concentration (Tmax) for Palbociclib: Tmax for palbociclib in the single-dose part (lead-in phase) was observed directly from data as time of first occurrence. 3. Single-dose PK: Area Under the Plasma Concentration Versus Time Curve (AUC) From Time 0 to the Time 10 Hours (AUC10) for Palbociclib: AUC10 for palbociclib in the single-dose part (lead-in phase) was obtained by linear/log trapezoidal method.
Secondary Obj.:	1. Number of Participants With Treatment-Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs) 2. Number of Participants With Treatment-Emergent AEs by Maximum National Cancer Institute Common Terminology Criteria for Adverse Events (NCI CTCAE) Grade 3. Number of Participants With Laboratory Test Abnormalities

2.2 Background & Rationale

As part of the global clinical development program for Palbociclib, studies are planned in cancer patients in China. An assessment of Palbociclib pharmacokinetics in Chinese patients, as required by the Chinese Health Authorities, is therefore warranted. In addition, safety and efficacy will be also evaluated.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: COMPLETED
Target N:	26

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* ER(+), HER2(-), postmenopausal adult (ages 18-65 years, inclusive) Chinese women with proven diagnosis of adenocarcinoma of the breast with evidence locoregionally recurrent or metastatic disease not amenable to resection or radiation therapy with curative intent and for whom chemotherapy is not clinically indicated.

a. Postmenopausal women: i. Prior bilateral surgical oophorectomy; or ii. Medically confirmed post-menopausal status defined as spontaneous cessation of regular menses for at least 12 consecutive months with no alternative pathological or physiological cause b. Documentation of histologically or cytologically confirmed diagnosis of: i. ER(+) breast cancer. c. Documentation of HER2(-) breast cancer. d. Previously untreated with any systemic anti cancer therapy for their locoregionally recurrent or metastatic ER+ disease.

* Measurable disease as defined per RECIST v.1.1 or bone-only disease. - Tumor lesions previously irradiated or subjected to other locoregional therapy will only be deemed measurable if disease progression at the treated site after completion of therapy is clearly documented.

4.2 Exclusion Criteria

* HER2-positive tumor as defined by documentation of erbB-2 gene amplification by FISH (as defined by a HER2/CEP17 ratio ≥ 2) or chromogenic in situ hybridization (CISH, as defined by the manufacturer's kit instruction) or documentation of HER2 overexpression by IHC (defined as IHC3+, or IHC2+ with FISH or CISH confirmation) based on local laboratory results

* Patients with advanced, symptomatic, visceral spread, that are at risk of life-threatening complications in the short term (including patients with massive uncontrolled effusions [pleural, pericardial, peritoneal], pulmonary lymphangitis, and over 50% liver involvement).

11. Study Identifiers & Governance

Primary ID:	855793302196989965
Registry Number:	NCT02499146
Sponsor:	Pfizer
Study Title:	Palbociclib Pharmacokinetics Study In Postmenopausal Chinese Women With ER (+), HER2 (-) Advanced Breast Cancer

15. Sign-off & Approval
