

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                  |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Phase I/Ib Global, Multicenter, Open-label Umbrella Study Evaluating the Safety and Efficacy of Targeted Therapies in Subpopulations of Patients With Metastatic Colorectal Cancer (INTRINSIC) |
| Short Title:             | A Study Evaluating the Safety and Efficacy of Targeted Therapies in Subpopulations of Patients With Metastatic Colorectal Cancer (INTRINSIC)                                                     |
| Protocol Number:         | 897329816361833137                                                                                                                                                                               |
| NCT Number:              | NCT04929223                                                                                                                                                                                      |
| Sponsor Name:            | Roche                                                                                                                                                                                            |
| Investigational Product: | bevacizumab                                                                                                                                                                                      |
| Phase:                   | PHASE1                                                                                                                                                                                           |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                        |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Objective Response Rate: Defined as the proportion of participants with a complete response or partial response, as determined by the investigator according to RECIST v1.1 |
| Secondary Obj.:    | 1. Duration of Response 2. Disease Control Rate 3. Percentage of Participants with Adverse Events (AEs)                                                                        |

### 2.2 Background & Rationale

This open-label, exploratory study is designed to evaluate the safety and efficacy of targeted therapies or immunotherapy as single agents or combinations, in participants with metastatic colorectal cancer (mCRC) whose tumors are biomarker positive as per treatment arm-specific definition. Eligible participants with mCRC will be enrolled into specific treatment arms based on their biomarker assay results.

## 3. Study Design & Methodology

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING |
| Target N:         | 542                                                     |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided
