

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                     |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Post-trial Access Roll-over Study to Allow Access to Ribociclib (LEE011) for Patients Who Are on Ribociclib Treatment in Novartis-sponsored Study |
| Short Title:             | Roll-over Study to Allow Continued Access to Ribociclib                                                                                             |
| Protocol Number:         | 242532514829724191                                                                                                                                  |
| NCT Number:              | NCT05161195                                                                                                                                         |
| Sponsor Name:            | Novartis                                                                                                                                            |
| Investigational Product: | tamoxifen                                                                                                                                           |
| Phase:                   | PHASE4                                                                                                                                              |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                           |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                      |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Percentage of participants with treatment-emergent adverse events (AES): The percentage of participants with treatment-emergent adverse events will be summarized, including significant adverse events leading to discontinuation, and adverse events leading to dose adjustment |
| Secondary Obj.:    | 1. Clinical benefit rate                                                                                                                                                                                                                                                             |

### 2.2 Background & Rationale

This is an open-label, multi-center, roll-over study to evaluate the long term safety of ribociclib in combination with other drugs in participants who are participating in a Novartis sponsored global study, that has fulfilled requirements for its primary objective(s), and who in the opinion of the Investigator, would benefit from continued treatment.

## 3. Study Design & Methodology

|                   |                                                                    |
|-------------------|--------------------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE4, Status: ACTIVE_NOT_RECRUITING |
| Target N:         | 134                                                                |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

|                  |                    |
|------------------|--------------------|
| Primary ID:      | 242532514829724191 |
| Registry Number: | NCT05161195        |

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

**Sponsor:** Novartis

**Study Title:** Roll-over Study to Allow Continued Access to Ribociclib

## 15. Sign-off & Approval

Principal Investigator: \_\_\_\_\_ Date: \_\_\_\_\_

Clinical Operations Lead: \_\_\_\_\_ Date: \_\_\_\_\_

Lead Statistician: \_\_\_\_\_ Date: \_\_\_\_\_
