

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Interventional, Multicentre, Phase IV, Single-Arm, Open-Label Study to Investigate the Efficacy and Safety of Dapagliflozin in Chinese Adult Patients With Chronic Kidney Disease
Short Title:	A Study of Dapagliflozin in Chinese Adult Patients With Chronic Kidney Disease
Protocol Number:	381375159678120420
NCT Number:	NCT06610526
Sponsor Name:	AstraZeneca
Investigational Product:	dapagliflozin
Phase:	PHASE4
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Time to the first occurrence of any of the components of the composite: 50% sustained decline in eGFR or Reaching ESRD or CV Death or Renal Death.: Data is reported as descriptive statistics.
Secondary Obj.:	1. Percentage change in UACR from baseline 2. Time to the first occurrence of any of the components of the composite: ? 50% sustained decline in eGFR or Reaching ESRD or Renal death 3. Time to the first occurrence of either of the components of the composite: CV death or Hospitalization for heart failure

2.2 Background & Rationale

The purpose of this study is to describe the efficacy and safety information with dapagliflozin in Chinese patients with chronic kidney disease.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE4, Status: RECRUITING
Target N:	700

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Provision of signed informed consent prior to any study specific procedures
- * Chinese Female or male aged ? 18 years at the time of consent
- * eGFR ? 25 and ? 75 mL/min/1.73m² (CKD-EPI Formula) at visit 1
- * Evidence of increased albuminuria 3 months or more before visit 1 and UACR ? 200 and ? 5000 mg/g at visit 1
- * Stable, and for the patient maximum tolerated labelled daily dose, treatment with ACE-I or ARB for at least 4 weeks

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

before visit 1, if not medically contraindicated

4.2 Exclusion Criteria

- * Autosomal dominant or autosomal recessive polycystic kidney disease, lupus nephritis or anti-neutrophil cytoplasmic antibodies-associated vasculitis
- * Receiving cytotoxic therapy, immunosuppressive therapy or other immunotherapy for primary or secondary renal disease within 6 months prior to enrolment
- * History of organ transplantation
- * Receiving therapy with an SGLT2 inhibitor within 8 weeks prior to enrolment or previous intolerance of an SGLT2 inhibitor
- * T1DM
- * New York Heart Association class IV Congestive Heart Failure at the time of enrolment
- * MI, unstable angina, stroke or TIA within 12 weeks prior to enrolment
- * Coronary revascularization (PCI or CABG) or valvular repair/replacement within 12 weeks prior to enrolment
- * Any condition outside the renal and CV disease area, such as but not limited to malignancy, with a life expectancy of less than 2 years based on investigator's clinical judgement
- * Active malignancy requiring treatment at the time of visit 1 (with the exception of successfully treated basal cell or treated squamous cell carcinoma)
- * Hepatic impairment (AST or ALT $\geq 3 \times$ ULN; or total bilirubin $\geq 2 \times$ ULN at time of enrolment). An isolated increase in bilirubin in patients with known Gilbert's syndrome is not a reason for exclusion
- * Known blood-borne diseases
- * Women of child-bearing potential (ie, those who are not chemically or surgically sterilised or who are not post-menopausal) who are not willing to use a medically accepted method of contraception that is considered reliable in the judgment of the investigator, from the time of signing the informed consent throughout the study and 4 weeks thereafter, OR women who have a positive pregnancy test at enrolment OR women who are breast-feeding
- * Involvement in the planning and/or conduct of the study (applies to both AstraZeneca personnel and/or site personnel)
- * Previous enrolled in the present study
- * Participation in another clinical study with a study intervention during the last month prior to enrolment
- * Inability of the patient, in the opinion of the investigator, to understand and/or comply with study intervention, procedures and/or follow-up OR any conditions that, in the opinion of the investigator, may render the patient unable to complete the study

11. Study Identifiers & Governance

Primary ID: 381375159678120420

Registry Number: NCT06610526

Sponsor: AstraZeneca

Study Title: A Study of Dapagliflozin in Chinese Adult Patients With Chronic Kidney Disease

15. Sign-off & Approval
