

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Multicenter, Single-Arm, Open-Label, Extension, Rollover Study To Evaluate The Long-Term Safety And Efficacy Of Ocrelizumab In Patients With Multiple Sclerosis
Short Title:	A Rollover Study to Evaluate the Long-Term Safety and Efficacy of Ocrelizumab In Patients With Multiple Sclerosis
Protocol Number:	1152906376336024408
NCT Number:	NCT05269004
Sponsor Name:	Roche
Investigational Product:	ocrelizumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Incidence and severity of adverse events, with severity determined according to the NCI CTCAE v5.0
Secondary Obj.:	1. Change in Expanded Disability Status Scale (EDSS) score over time 2. Change in 9-Hole Peg Test (9HPT) over time 3. Change in Timed 25-Foot Walk Test (T25FWT) over time

2.2 Background & Rationale

This is a Phase IIIb, single-arm, multicenter, OLE study. Participants receiving ocrelizumab as an investigational medicinal product (IMP) in a Roche sponsored Parent study who continue to receive ocrelizumab or are in safety follow-up at the time of the closure of their respective Parent study (WA21092, WA21093 or WA25046) are eligible for enrollment in this extension study. Participants who will continue ocrelizumab treatment will receive IMP based on the dosage and administration received at the time of rollover from the Parent study.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	1300

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided
