

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3b, Multi-center, Open-label, Treatment Optimization Study of Oral Asciminib in Patients With Chronic Myelogenous Leukemia in Chronic Phase (CML-CP) Previously Treated With 2 or More Tyrosine Kinase Inhibitors
Short Title:	Asciminib Treatment Optimization in ? 3rd Line CML-CP
Protocol Number:	261200053432658354
NCT Number:	NCT04948333
Sponsor Name:	Novartis
Investigational Product:	guaifenesin
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: 1. Major Molecular Response (MMR) Rate at Week 48 for All Patients With no Evidence of MMR at Baseline: Major Molecular Response (MMR) is defined as a significant reduction in the level of BCR::ABL1 transcripts, which are the genetic markers of chronic myeloid leukemia (CML). Specifically, MMR is achieved when there is a ? 3.0 log reduction in BCR::ABL1 transcripts compared to a standardized baseline, which corresponds to a BCR::ABL1/ABL1 ratio of ? 0.1% on the international scale (IS).

The Major Molecular Response (MMR) rate at Week 48 for all patients with no evidence of MMR at baseline refers to the percentage of patients who achieve MMR after 48 weeks of treatment, despite not having MMR at the start.

Secondary Obj.: 1. MMR Rate at Week 12, 24, 36, 72, 96 and 144 for Patients With no MMR at Baseline
2. Major Molecular Response (MMR) Rate at Week 48 for Patients With MMR at Baseline
3. Time to MMR for Subjects Without MMR at Baseline

2.2 Background & Rationale

The purpose of the study is to optimize the treatment of asciminib in patients with chronic myelogenous leukemia in chronic phase (CML-CP) previously treated with 2 or more Tyrosine Kinase Inhibitors (TKIs).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	199

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID: 261200053432658354
Registry Number: NCT04948333
Sponsor: Novartis
Study Title: Asciminib Treatment Optimization in ? 3rd Line CML-CP

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
