

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3, Randomized, Double-blind, Placebo-controlled Study to Evaluate the Efficacy and Safety of Rimegepant in Migraine Prevention in Children and Adolescents ? 6 to <18 Years of Age
Short Title:	Efficacy and Safety Study of Rimegepant for the Preventative Treatment of Migraine in Pediatric Subjects
Protocol Number:	292342933567513069
NCT Number:	NCT05156398
Sponsor Name:	Pfizer
Investigational Product:	rimegepant
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Change from baseline in the mean number of migraine days per month as measured over the 12-week double-blind phase of the study in adolescents with episodic migraine: Reduction from baseline in mean number of migraine days per month
Secondary Obj.:	1. Achievement of at least a 50% reduction from baseline in mean monthly migraine days over the course of the double-blind phase in adolescents with episodic migraine 2. Change from baseline in the mean number of migraine days per month in the first 4 weeks (Weeks 1 through 4) of the double-blind treatment phase in adolescents with episodic migraine. 3. The mean change from baseline in the Pediatric Quality of Life (PedsQL?) total score at Week 12 of the double-blind treatment phase in adolescents with episodic migraine.

2.2 Background & Rationale

The purpose of this study is to compare the efficacy and safety of rimegepant to placebo as a preventative treatment for migraine in children and adolescents ? 6 to <18 years with episodic migraine.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	640

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

1. Subject has at least a 6 month history of migraine (with or without aura) and including the following:

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. 14 or less headache days per month during the 3 month period prior to the Screening Visit
 2. 6 or more migraine days during the Observation Period
 3. 14 or less headache days during the Observation Period
 4. Pediatric Migraine Disability Assessment Scale (PedMIDAS) Disability Score of ≥ 10 to ≤ 50 , indicating mild (score of 11 to 30) or moderate (score of 31 to 50) disruption in daily activities, as assessed at the Baseline (Randomization) Visit
 5. Ability to verbally distinguish migraine attacks from tension/cluster or other types of headaches
 6. Migraine attacks, on average, lasting 4 - 72 hours if untreated
 7. Subjects on prophylactic migraine medication are permitted to remain on therapy if the dose has been stable for at least 3 months (12 weeks) prior to the Screening Phase, and the dose is not expected to change during the course of the study.
- 2) Male and female subjects ≥ 6 to ≤ 18 years; subjects must be less than 18 at the time of signing assent / consent.

3) Subjects must have a weight of ≥ 40 kg (child cohort requirement ≥ 15 kg) at the Screening Visit.

4.2 Exclusion Criteria

1. Subjects with a history of basilar migraine, cluster headaches, or hemiplegic migraine
2. The subject has a continuous migraine (defined as an unrelenting headache) within 1 month prior to Screening Visit.
3. The subject has a history or diagnosis of complications of migraine
4. The subject has a confounding and clinically significant pain syndrome that may interfere with the subject's ability to participate in this study.
5. The subject has any current psychiatric condition that is uncontrolled and/or untreated for a minimum of 6 months prior to the Screening Visit. Subjects with a lifetime history of psychosis and/or mania are excluded.
6. History of suicidal behavior or the subject is at risk of self-harm or harm to others.
7. History of major psychiatric disorder.
8. The subject has a current diagnosis or history of substance abuse
9. The subject has a history of moderate or severe head trauma or other neurological disorder (including seizure disorder) or systemic medical disease that is, in the investigator's opinion, likely to affect central nervous system functioning.

11. Study Identifiers & Governance

Primary ID:	292342933567513069
Registry Number:	NCT05156398
Sponsor:	Pfizer
Study Title:	Efficacy and Safety Study of Rimegepant for the Preventative Treatment of Migraine in Pediatric Subjects

15. Sign-off & Approval
