

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3, Open-label Study of Ifinatamab Deruxtecan Versus Docetaxel in Participants With Metastatic Castration-Resistant Prostate Cancer (mCRPC) (IDeate-Prostate01)
Short Title:	A Clinical Study of Ifinatamab Deruxtecan (I-DXd) in People With Metastatic Prostate Cancer (MK-2400-001)
Protocol Number:	353553842076402844
NCT Number:	NCT06925737
Sponsor Name:	Merck
Investigational Product:	prednisone
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Overall Survival (OS): OS is defined as the time from randomization to death due to any cause. 2. Radiographic Progression Free Survival (rPFS): rPFS is defined as the time from randomization to the first documented disease progression per prostate cancer working group (PCWG)-modified Response Evaluation Criteria In Solid Tumors (RECIST) 1.1 by blinded independent central review (BICR) or death due to any cause, whichever occurs first.
Secondary Obj.:	1. Time to First Subsequent Therapy (TFST) 2. Objective Response (OR) 3. Duration of Response (DOR)

2.2 Background & Rationale

Researchers are looking for new ways to treat metastatic castration-resistant prostate cancer (mCRPC). Researchers have designed a study medicine called ifinatamab deruxtecan (also called I-DXd or MK-2400) to treat mCRPC. The goal of this study is to learn if people who receive I-DXd live longer overall and live longer without the cancer growing or spreading than people who receive chemotherapy,

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	1440

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Has diagnosis of metastatic castration-resistant prostate cancer (mCRPC)
- * Has prostate cancer progression while on androgen deprivation therapy (ADT) (or post bilateral orchiectomy) within 6 months prior to entering the study
- * Has received prior treatment with 1 or 2 androgen receptor pathway inhibitor (ARPI) and progressed during or after at least 8 weeks of treatment

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * History of (non-infectious) interstitial lung disease (ILD)/pneumonitis that required steroids
- * Has uncontrolled or significant cardiovascular disease
- * Has received prior treatment with a taxane-based chemotherapy agent for mCRPC

11. Study Identifiers & Governance

Primary ID:	353553842076402844
Registry Number:	NCT06925737
Sponsor:	Merck
Study Title:	A Clinical Study of Ifinatamab Deruxtecan (I-DXd) in People With Metastatic Prostate Cancer (MK-2400-001)

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
