

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Randomized, Controlled, Open Label, Phase III Study Evaluating the Efficacy and Safety of JDQ443 Versus Docetaxel in Previously Treated Subjects With Locally Advanced or Metastatic KRAS G12C Mutant Non-small Cell Lung Cancer
Short Title:	Study of JDQ443 in Comparison With Docetaxel in Participants With Locally Advanced or Metastatic KRAS G12C Mutant Non-small Cell Lung Cancer
Protocol Number:	61400814159910334
NCT Number:	NCT05132075
Sponsor Name:	Novartis
Investigational Product:	docetaxel
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression free survival (PFS): PFS is the time from date of randomization/start of treatment to the date of event defined as the first documented progression or death due to any cause. PFS is based on central assessment and using RECIST 1.1 criteria.
Secondary Obj.:	1. Overall Survival (OS) 2. Overall Response Rate (ORR) 3. Disease Control Rate (DCR)

2.2 Background & Rationale

This is a phase III randomized open label study designed to compare JDQ443 as monotherapy to docetaxel in participants with advanced non-small cell lung cancer (NSCLC) harboring a KRAS G12C mutation who have been previously treated with a platinum-based chemotherapy and immune checkpoint inhibitor therapy either in sequence or in combination.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	95

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant has histologically confirmed locally advanced/metastatic (stage IIIB/IIIC or IV)
- * Participant has a KRAS G12C mutation present in tumor tissue or plasma prior to enrollment, as determined by a Novartis designated central laboratory or by accepted local tests.
- * Participants has received one prior platinum-based chemotherapy regimen and one prior immune checkpoint inhibitor

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

therapy for locally advanced or metastatic disease

* Participant has at least 1 evaluable (measurable or non-measurable) lesion by RECIST 1.1 at the screening visit.

4.2 Exclusion Criteria

* Participants who have previously received docetaxel (except if received in neoadjuvant or adjuvant setting with no progression within 12 months after the of end of treatment), or any other KRAS G12C inhibitor.

* Participant has EGFR-sensitizing mutation and/or ALK rearrangement by local laboratory testing. Participants with other druggable alterations will be excluded if required by local guidelines.

* Participant has known active central nervous system (CNS) metastases and/or carcinomatous meningitis

* Participant has an history of interstitial lung disease or pneumonitis grade \> 1.

Other inclusion/exclusion criteria may apply

11. Study Identifiers & Governance

Primary ID: 61400814159910334

Registry Number: NCT05132075

Sponsor: Novartis

Study Title: Study of JDQ443 in Comparison With Docetaxel in Participants With Locally Advanced or Metastatic KRAS G12C Mutant Non-small Cell Lung Cancer
