

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Multi-center, Open-label Extension Study of Subcutaneous Secukinumab to Evaluate the Long-term Safety and Tolerability in Polymyalgia Rheumatica (PMR)
Short Title:	Open-label, Long-term Safety Study of Secukinumab in Polymyalgia Rheumatica (PMR)
Protocol Number:	669112961238215986
NCT Number:	NCT06331312
Sponsor Name:	Novartis
Investigational Product:	secukinumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: 1. Incidences of treatment emergent adverse events (AEs) and serious adverse events (SAEs): The number and percentage of participants with treatment emergent AEs/SAEs will be summarized. No hypothesis testing will be performed.

Secondary Obj.: Not Provided

2.2 Background & Rationale

The purpose of this extension study is to assess the safety and tolerability of secukinumab when administered long-term in patients with polymyalgia rheumatica.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	300

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Participants who have completed 52-week Treatment Period as per protocol in a Novartis study of secukinumab in PMR patients (the "core study" - Study CAIN457C22301), AND

* who have experienced a relapse during the treatment-free follow-up period of the core study, AND

* who have not been on rescue treatment.

* The participant would potentially derive benefit from secukinumab, and the benefit outweighs the risk, based on the investigator's judgement.

4.2 Exclusion Criteria

* Use of prohibited medications, as specified in the protocol

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * History of ongoing, chronic or recurrent infectious disease (i.e., human immunodeficiency virus (HIV), hepatitis B (HBV), hepatitis C (HCV), active tuberculosis infection (TB))
- * History of lymphoproliferative disease or any known malignancy or history of malignancy of any organ system within the past 5 years (except for basal cell carcinoma or actinic keratosis that have been treated with no evidence of recurrence in the past 3 months carcinoma in situ of the cervix or non-invasive malignant colon polyps that have been removed).
- * Live vaccinations (e.g., monkey pox vaccine, oral polio vaccine, varicella/zoster vaccines) within 6 weeks prior to Baseline
- * Subjects whose participation in the extension study could expose them to an undue safety risk

11. Study Identifiers & Governance

Primary ID: 669112961238215986

Registry Number: NCT06331312

Sponsor: Novartis

Study Title: Open-label, Long-term Safety Study of Secukinumab in Polymyalgia Rheumatica (PMR)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
