

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase III, Randomized, Double-Masked, Placebo-Controlled, Multicenter Study to Evaluate the Efficacy, Safety, Pharmacokinetics, and Pharmacodynamics of Satralizumab in Participants With Moderate-to-Severe Thyroid Eye Disease
Short Title:	A Study to Evaluate the Efficacy, Safety, Pharmacokinetics, and Pharmacodynamics of Satralizumab in Participants With Thyroid Eye Disease
Protocol Number:	706325762556584387
NCT Number:	NCT05987423
Sponsor Name:	Roche
Investigational Product:	satralizumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of Participants Achieving ≥ 2 mm Reduction in Proptosis from Baseline (Day 1) at Week 24 in the Study eye: Provided there is no deterioration of proptosis [≥ 2 millimeters (mm) increase] in the fellow eye
Secondary Obj.:	1. Change in Proptosis 2. Percentage of Participants Achieving ≥ 1 Grade Reduction/Improvement in Diplopia Among Participants with Baseline Diplopia 3. Percentage of Participants Achieving Absence of Motility-induced Pain

2.2 Background & Rationale

The purpose of this study is to assess the efficacy, safety, pharmacokinetics, and pharmacodynamics of subcutaneous (SC) satralizumab, a recombinant, humanized anti-interleukin-6 (IL-6) receptor monoclonal antibody, in participants with thyroid eye disease (TED).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	131

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

\- Clinical diagnosis of TED based on CAS

4.2 Exclusion Criteria

* Decrease in CAS or proptosis of ≥ 2 points or ≥ 2 mm, respectively, in the study eye between Screening and Study Baseline (Day 1)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Requiring immediate surgical ophthalmological intervention or planning corrective surgery or irradiation during the course of the study, in the judgment of the investigator
- * Identified pre-existing ophthalmic disease that, in the judgment of the investigator, would preclude study participation or complicate interpretation of study results, including corneal decompensation unresponsive to medical management and including ophthalmic diseases that will likely require prohibited therapy during the study
- * Any serious medical condition or abnormality in clinical laboratory tests that, in the investigator's judgment, precludes an individual's safe participation in and completion of the study
- * Pregnant or breastfeeding, or intention of becoming pregnant during the study or within 3 months after the final dose of satralizumab

11. Study Identifiers & Governance

Primary ID: 706325762556584387

Registry Number: NCT05987423

Sponsor: Roche

Study Title: A Study to Evaluate the Efficacy, Safety, Pharmacokinetics, and Pharmacodynamics of Satralizumab in Participants With Thyroid Eye Disease

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
