

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open Label, Multicenter Extension Study in Patients Previously Enrolled in a Genentech and/or F. Hoffmann-La Roche Ltd Sponsored Atezolizumab Study (IMbrella B)
Short Title:	A Study in Patients Previously Enrolled in a Genentech and/or F. Hoffmann-La Roche Ltd Sponsored Atezolizumab Study
Protocol Number:	924306364132764224
NCT Number:	NCT03768063
Sponsor Name:	Roche
Investigational Product:	paclitaxel
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants With Continued Access to Atezolizumab-Based Therapy and/or Comparator Agent(s)
Secondary Obj.:	1. Percentage of Participants With Serious Adverse Events (SAEs) According to National Cancer Institute (NCI) Common Terminology Criteria for Adverse Events (CTCAE) Version 5.0 2. Percentage of Participants With Adverse Events of Special Interest Determined According to NCI CTCAE Version 5.0 3. Treatment Duration

2.2 Background & Rationale

This is an open-label, multicenter, extension study. Patients who are receiving clinical benefit from atezolizumab monotherapy or atezolizumab in combination with other agent(s) or combination/comparator agent(s) during participation in a Genentech or Roche-sponsored study (the parent study), who are eligible to continue treatment and who do not have access to the study treatment locally, may continue to receive study treatment in this extension study following roll-over from the parent study.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	1000

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Eligible for continuing atezolizumab-based therapy at the time of roll-over from the parent study, as per the parent study protocol or

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Eligible for continuing the comparator agent(s) in a Genentech- or Roche-sponsored study as per the parent study protocol, with no access to commercially available comparator agent
- * Time between the last dose of treatment received in parent study and first dose in extension study is no longer than the interruption period allowed in the parent study. First dose of study treatment in this extension study will be received within 7 days of the treatment interruption window allowed by the parent study
- * Continue to benefit from atezolizumab-based study treatment or from the comparator at the time of roll-over from the parent study as assessed by the investigator
- * Negative serum pregnancy test within 7 days prior to start of study treatment in women of childbearing potential
- * For women of childbearing potential: agreement to remain abstinent or use contraceptive methods, and agreement to refrain from donating eggs
- * For men: agreement to remain abstinent or use contraceptive measures, and agreement to refrain from donating sperm

4.2 Exclusion Criteria

- * Meet any of the study treatment discontinuation criteria specified in the parent study at the time of enrollment in this extension study
- * Study treatment or comparator agent is commercially marketed in the patient's country for the patient-specific disease and is accessible to the patient
- * Treatment with any anti-cancer treatment during the time between last treatment in the parent study and the first dose of study treatment in this extension study
- * Permanent discontinuation of atezolizumab for any reason during the parent study or during the time between last treatment in the parent study and the first dose of study treatment in this extension study (if applicable). Exception: Participants who permanently discontinued atezolizumab from parent studies that permit participants to continue treatment with the combination agent(s) alone after permanently discontinuing atezolizumab are eligible to enroll in this study.
- * Ongoing serious adverse event(s) that has not resolved to baseline level or Grade ?1 from the parent study or during the time between the last treatment in the parent study and the first dose of study treatment in this extension study
- * Any condition that, in the opinion of the investigator, would interfere with the interpretation of patient safety or place the patient at high risk for treatment-related complications
- * Concurrent participation in any therapeutic clinical trial (other than the parent study)
- * Pregnant or lactating, or intending to become pregnant during this extension study and for the period after the last dose of study treatment specified in the designated referenced safety information (RSI)

11. Study Identifiers & Governance

Primary ID:	924306364132764224
Registry Number:	NCT03768063
Sponsor:	Roche
Study Title:	A Study in Patients Previously Enrolled in a Genentech and/or F. Hoffmann-La Roche Ltd Sponsored Atezolizumab Study
