

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	AN INTERVENTIONAL, PHASE 3, DOUBLE-BLIND, RANDOMIZED STUDY TO EVALUATE THE EFFICACY AND SAFETY OF PF-08634404 IN COMBINATION WITH CHEMOTHERAPY VERSUS BEVACIZUMAB IN COMBINATION WITH CHEMOTHERAPY IN TREATMENT-NAÏVE PARTICIPANTS WITH METASTATIC COLORECTAL CANCER
Short Title:	A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Metastatic Colorectal Cancer
Protocol Number:	983576661696837234
NCT Number:	NCT07222800
Sponsor Name:	Pfizer
Investigational Product:	bevacizumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression-free survival (PFS) per Response Evaluation Criteria in Solid Tumors 1.1 (RECIST 1.1) by Blinded Independent Central Review (BICR): Progression-free survival is defined as the time from the date of randomization to the date of the first documentation of objective progressive disease (PD) assessed by BICR per RECIST 1.1, or death due to any cause, whichever occurs first. 2. Overall survival (OS): Overall survival defined as the time from the date of randomization to the date of death due to any cause.
Secondary Obj.:	1. PFS per RECIST 1.1 by investigator assessment 2. Objective Response Rate (ORR) by BICR 3. Objective Response Rate (ORR) by investigator

2.2 Background & Rationale

The purpose of this study is to learn more about a new medicine called PF-08634404, and how well it works in people with cancer of the colon or rectum (CRC)). The goal is to understand if the new study medicine, combined with chemotherapy that is approved for colorectal cancer, can help people whose cancer has spread or returned after treatments taken before.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: NOT_YET_RECRUITING
Target N:	800

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

- * Histological or cytological confirmed colorectal adenocarcinoma.
- * Evidence of Stage IV metastatic disease.
- * Eastern Cooperative Oncology Group performance status (ECOG) 0-1
- * At least one measurable lesion according to RECIST 1.1 per Investigator assessment.
- * Adequate hepatic, liver, and renal function

4.2 Exclusion Criteria

Participants are excluded from the study if any of the following criteria apply:

- * Locally confirmed BRAF V600E mutation
- * Locally confirmed microsatellite instability (MSI)-high or DNA mismatch repair deficiency (dMMR) colorectal cancer
- * Participants with known active symptomatic CNS lesions, including leptomeningeal metastasis, brainstem, meningeal, or spinal cord metastases or compression
- * Clinically significant risk of hemorrhage or fistula
- * Major surgery or severe trauma within 4 weeks prior to the first dose, or planned major surgery during the study
- * History of allogeneic organ transplantation and allogeneic hematopoietic stem cell transplantation
- * Any Grade ≥3 bleeding/hemorrhage events within 28 days of Cycle 1 Day 1, or prior history of clinically significant bleeding events
- * Clinically significant cardiovascular disease, or other comorbidities, within 6 months prior to first dose
- * Participants with active autoimmune diseases requiring systemic treatment within the past 2 years
- * Evidence of non-infectious or drug-induced interstitial lung disease (ILD) pneumonitis

11. Study Identifiers & Governance

Primary ID:	983576661696837234
Registry Number:	NCT07222800
Sponsor:	Pfizer
Study Title:	A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Metastatic Colorectal Cancer

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
