

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase III, Multicentre, Randomised, Open-label Study to Compare the Efficacy and Safety of AZD0486 Plus Rituximab Versus Chemotherapy Plus Rituximab in Previously Untreated Participants With Follicular Lymphoma (SOUNDTRACK-F1)
Short Title:	A Study of AZD0486 Plus Rituximab in Previously Untreated Follicular Lymphoma Patients
Protocol Number:	415042883095656607
NCT Number:	NCT06549595
Sponsor Name:	AstraZeneca
Investigational Product:	agalsidase beta
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. SRI Primary: Incidence, nature and severity of AEs and SAEs. Incidence and nature of study drug discontinuations, dose reductions, and dose delays due to AEs; Frequency, severity, and relationship to study drug of AEs and SAEs; dose modifications; changes in physical examination and safety procedures. 2. SRI Primary: Determination of the recommended Phase III dose (RP3D): The RP3D will be the dose of AZD0486 selected for the Phase 3 part based on safety data compiled during the safety run-in part 3. Phase 3 Dual Primary: To demonstrate the superiority of AZD0486 plus rituximab compared to Investigator's choice of SoC chemoimmunotherapy: PFS, based on Lugano 2014 Response Criteria, as assessed by BICR.
Secondary Obj.:	1. Safety Run in and Phase 3: ORR at EoI (Investigator assessed) 2. Safety Run In and Phase 3: CR Rate 3. Safety Run In and Phase 3: CR at EoI

2.2 Background & Rationale

This is a global, randomised, Phase III, multicentre, open-label study evaluating the efficacy, safety and the degree of added benefit of the AZD0486 plus rituximab combination compared to Investigator's choice of 3 standard immunochemotherapy regimen, conducted in participants with untreated FL.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	1015

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

1. Participant must be at least 18 years of age, inclusive, at the time of signing the ICF.
2. Histologically confirmed diagnosis of classic FL per WHO 2022 classification
3. ECOG performance status of 0 to 2
4. No prior systemic lymphoma-directed therapy
5. Need for systemic treatment meeting at least 1 GELF criteria
6. FDG-avid and measurable disease
7. Stage II to IV and FLIPI 2-5 \[Phase III only\]
8. Adequate liver, hematological, renal and cardiac function.

The above is a summary, other inclusion criteria details may apply

4.2 Exclusion Criteria

1. Follicular large B-cell lymphoma (WHO 2022 classification), formerly Follicular lymphoma Grade 3B (WHO 2016 classification) or suspicion for histologic transformation to high-grade/aggressive lymphoma
2. Contra-indication to BR, RCVP, and R-CHOP
3. Participants with or history of CNS lymphoma
4. Presence of >5000 circulating lymphoma cells
5. Active or uncontrolled infection requiring systemic therapy and which places participant at unacceptable risk if he/she were to participate in the study

The above is a summary, other exclusion criteria details may apply

11. Study Identifiers & Governance

Primary ID:	415042883095656607
Registry Number:	NCT06549595
Sponsor:	AstraZeneca
Study Title:	A Study of AZD0486 Plus Rituximab in Previously Untreated Follicular Lymphoma Patients

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
