

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Multicenter, Randomized, Double-Blind Placebo-Controlled Phase 3 Study to Evaluate the Pharmacokinetics, Efficacy and Safety of Deucravacitinib (BMS-986165) in Pediatric Subjects With Moderate to Severe Plaque Psoriasis
Short Title:	A Study to Evaluate the Drug Levels, Efficacy and Safety of Deucravacitinib in Pediatric Participants With Moderate to Severe Plaque Psoriasis
Protocol Number:	4322140572307079
NCT Number:	NCT04772079
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	deucravacitinib
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Geometric mean observed average concentration at steady state (Cavg.ss) for deucravacitinib at Week 2: Part A 2. Maximum observed plasma concentration at steady state (Cmax.ss) for deucravacitinib at Week 2: Part A 3. Trough observed plasma concentration (Ctrough) for deucravacitinib at Week 2: Part A
Secondary Obj.:	1. Incidence of Adverse Events (AEs) 2. Incidence of serious adverse events (SAEs) 3. Incidence of clinically significant changes in clinical laboratory results: Hematology tests

2.2 Background & Rationale

The purpose of this pediatric study is to evaluate the drug levels, efficacy and safety of Deucravacitinib in pediatric participants aged 4 to <18 years with moderate to severe plaque psoriasis. This study includes two cohorts; Cohort 1 (age 12 to <18 years) and Cohort 2 (age 4 to <12 years), with two parts; for each cohort. Part A will evaluate the drug levels of BMS-986165 to enable selection of 2 dose levels to be studied in Part B. Part B will assess the efficacy and safety of two dose levels in pediatric participants with moderate to severe plaque psoriasis. The 5-year long-term extension (LTE) period will observe the long-term safety and tolerability of deucravacitinib in pediatric participants with psoriasis who have completed Parts A or B of the study.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	153

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID: 4322140572307079

Registry Number: NCT04772079

Sponsor: Bristol Myers Squibb

Study Title: A Study to Evaluate the Drug Levels, Efficacy and Safety of Deucravacitinib in Pediatric Participants With Moderate to Severe Plaque Psoriasis

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
