

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                                                                                                            |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Phase Ib/III, Open-label, Randomised Study of Capivasertib Plus CDK4/6 Inhibitors and Fulvestrant Versus CDK4/6 Inhibitors and Fulvestrant in Hormone Receptor-Positive and Human Epidermal Growth Factor Receptor 2-Negative Locally Advanced, Unresectable or Metastatic Breast Cancer (CAPItello-292) |
| Short Title:             | Capivasertib + CDK4/6i + Fulvestrant for Advanced/Metastatic HR+/HER2- Breast Cancer (CAPItello-292)                                                                                                                                                                                                       |
| Protocol Number:         | 756877908927442163                                                                                                                                                                                                                                                                                         |
| NCT Number:              | NCT04862663                                                                                                                                                                                                                                                                                                |
| Sponsor Name:            | AstraZeneca                                                                                                                                                                                                                                                                                                |
| Investigational Product: | fulvestrant                                                                                                                                                                                                                                                                                                |
| Phase:                   | PHASE3                                                                                                                                                                                                                                                                                                     |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                                                                                                                  |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Phase Ib: 1. The number of participants with dose-limiting toxicity, as defined in the protocol.: Dose-limiting toxicity as described in the protocol that is not related to disease progression, intercurrent illness or concomitant medications and that, despite optimal therapeutic intervention, meets protocol-defined criteria. 2. Phase Ib: 2. The number of participants with treatment-related adverse events.: Data will include clinical observations, ECG parameters, clinical chemistry and haematology and vital signs assessed as the number of participants with treatment-related adverse events. 3. Phase Ib: 3. The number of participants with treatment-related serious adverse events.: Data will include clinical observations, ECG parameters, clinical chemistry and haematology and vital signs assessed as the number of participants with treatment-related adverse events. |
| Secondary Obj.:    | 1. Phase Ib: 1. PK parameters for Palbociclib, Ribociclib, Abemaciclib: Cmax. 2. Phase Ib: 2. PK parameters for Palbociclib, Ribociclib, Abemaciclib: AUC0-72h. 3. Phase Ib: 3. PK parameters for Palbociclib, Ribociclib, Abemaciclib: AUC0-24h.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

### 2.2 Background & Rationale

A Phase Ib/III Open-label, Randomised Study of Capivasertib plus CDK4/6 Inhibitors and Fulvestrant versus CDK4/6 Inhibitors and Fulvestrant in Hormone Receptor-Positive and Human Epidermal Growth Factor Receptor 2-Negative Locally Advanced, Unresectable or Metastatic Breast Cancer (CAPItello-292)

## 3. Study Design & Methodology

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING |
|-------------------|---------------------------------------------------------|

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Target N: 895

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

Primary ID: 756877908927442163

Registry Number: NCT04862663

Sponsor: AstraZeneca

Study Title: Capivasertib + CDK4/6i + Fulvestrant for Advanced/Metastatic HR+/HER2- Breast Cancer (CAPItello-292)

## 15. Sign-off & Approval

Principal Investigator: \_\_\_\_\_ Date: \_\_\_\_\_

Clinical Operations Lead: \_\_\_\_\_ Date: \_\_\_\_\_

Lead Statistician: \_\_\_\_\_ Date: \_\_\_\_\_
