

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 3b, Open-label Study Evaluating the Efficacy and Safety of Luspatercept (BMS-986346/ACE-536) Initiated at Maximum Approved Dose in LR-MDS With IPSS-R Very Low-, Low-, or Intermediate-risk Who Require RBC Transfusions (MAXILUS)
Short Title:	A Study to Assess Luspatercept in Lower-risk Myelodysplastic Syndrome Participants
Protocol Number:	770002360579660393
NCT Number:	NCT06045689
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	luspatercept
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants who achieve red blood cell transfusion independence (RBC-TI) for 8 weeks with a simultaneous mean hemoglobin (Hb) increase of ≥ 1 g/dL from Week 1 to Week 24
Secondary Obj.:	1. Number of participants with a mean change in total RBC units transfused over a fixed 16-week period from Week 9 to Week 24 and from Week 33 to Week 48 2. Number of participants who have a time from first dose to first onset of RBC-TI ≥ 8 -, 12-, and 16-weeks from Week 1 to Week 24, from Week 1 to Week 48, and from Week 1 through EOT 3. Number of participants who achieve RBC-TI over any consecutive 8-week period from Week 1 to Week 24, from Week 1 to Week 48, and from Week 1 to EOT

2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy and safety of Luspatercept when administered at the maximum approved dose in low-risk Myelodysplastic Syndrome participants who require red blood cell transfusions.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	106

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant had documented diagnosis of MDS according to World Health Organization (WHO) classification that met Revised International Prognostic Scoring System (IPSS-R) classification of very low-, low-, or intermediate-risk disease.
- * Participant has an Eastern Cooperative Oncology Group (ECOG) score of 0, 1, or 2.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Participant must have red blood cell transfusions according to study criteria.

4.2 Exclusion Criteria

- * Participant has known clinically significant anemia due to iron, vitamin B12, or folate deficiencies, or autoimmune or hereditary hemolytic anemia, or gastrointestinal bleeding.
- * Participant has had a prior allogeneic or autologous stem cell transplant.
- * Participant has known history or diagnosis of AML.
- * Participant has uncontrolled hypertension.

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 770002360579660393
Registry Number: NCT06045689
Sponsor: Bristol Myers Squibb
Study Title: A Study to Assess Luspatercept in Lower-risk Myelodysplastic Syndrome Participants

15. Sign-off & Approval
