

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase III, Randomized, Open-Label, Multicenter, Global Study of Volrustomig (MEDI5752) in Combination With Carboplatin Plus Pemetrexed Versus Platinum Plus Pemetrexed or Nivolumab Plus Ipilimumab in Participants With Unresectable Pleural Mesothelioma (eVOLVE-Meso)
Short Title:	MEDI5752 in Combination With Carboplatin Plus Pemetrexed in Unresectable Pleural Mesothelioma
Protocol Number:	854826587529165999
NCT Number:	NCT06097728
Sponsor Name:	AstraZeneca
Investigational Product:	cisplatin
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Overall Survival (OS) in experimental arm relative to comparator arm: OS is defined as the time from randomization until the date of death due to any cause.
Secondary Obj.:	1. Overall Survival (OS) 2. Progression Free Survival (PFS) 3. Landmark OS

2.2 Background & Rationale

This is a phase III, randomized, open-label, multicenter, global study to determine the efficacy and safety of Volrustomig (MEDI5752) + Carboplatin + Pemetrexed vs the investigator's choice of platinum + Pemetrexed or Nivolumab + Ipilimumab in participants with unresectable pleural mesothelioma.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	825

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant must be ≥ 18 years at the time of screening
- * Histologically proven diagnosis of pleural mesothelioma with known histology (epithelioid vs. non-epithelioid)
- * Advanced unresectable disease that cannot be treated with curative surgery (with or without chemotherapy)
- * WHO/ECOG performance status of 0 or 1 with no deterioration (that is, ECOG PS ≤ 1) over the previous 2 weeks prior to day of first dosing
- * Has measurable disease per modified RECIST1.1

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Has adequate bone marrow reserve and organ function at baseline

Key Exclusion Criteria:

- * As judged by the investigator, any condition that would interfere with evaluation of the investigational product or interpretation of participant safety or study results.
- * Active or prior documented autoimmune or inflammatory disorders
- * History of another primary malignancy with exceptions.
- * Uncontrolled intercurrent illness
- * Tuberculosis, hepatitis B (HBV) or hepatitis C (HCV), human immunodeficiency virus (HIV) infection that is not well controlled
- * Any concurrent chemotherapy, radiotherapy, investigational, biologic, or hormonal therapy for cancer treatment
- * Untreated or progressive CNS metastatic disease

4.2 Exclusion Criteria

- * As judged by the investigator, any condition that would interfere with evaluation of the investigational product or interpretation of participant safety or study results.
- * Active or prior documented autoimmune or inflammatory disorders
- * History of another primary malignancy with exceptions.
- * Uncontrolled intercurrent illness
- * Tuberculosis, hepatitis B (HBV) or hepatitis C (HCV), human immunodeficiency virus (HIV) infection that is not well controlled
- * Any concurrent chemotherapy, radiotherapy, investigational, biologic, or hormonal therapy for cancer treatment
- * Untreated or progressive CNS metastatic disease

11. Study Identifiers & Governance

Primary ID: 854826587529165999

Registry Number: NCT06097728

Sponsor: AstraZeneca

Study Title: MEDI5752 in Combination With Carboplatin Plus Pemetrexed in Unresectable Pleural Mesothelioma

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
