

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                             |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | Phase III, Randomized, Open-label, Global, Multicenter Study of Rilvegostomig or Durvalumab in Combination With Chemotherapy as a First-line Treatment for Patients With Advanced Biliary Tract Cancer (ARTEMIDE-Biliary02) |
| Short Title:             | A Study of Rilvegostomig or Durvalumab Plus Chemotherapy for First-Line Treatment of Biliary Tract Cancer (ARTEMIDE-Biliary02)                                                                                              |
| Protocol Number:         | 883681623994575647                                                                                                                                                                                                          |
| NCT Number:              | NCT07221253                                                                                                                                                                                                                 |
| Sponsor Name:            | AstraZeneca                                                                                                                                                                                                                 |
| Investigational Product: | cisplatin                                                                                                                                                                                                                   |
| Phase:                   | PHASE3                                                                                                                                                                                                                      |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                                   |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                       |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Overall Survival (OS) in the PDL1 ? 1% population: Overall Survival is defined as time from randomization until the date of death due to any cause.                                                |
| Secondary Obj.:    | 1. Overall Survival in the intent to treat (ITT) population 2. Progression Free Survival (PFS) in the PDL1 ? 1% population 3. Progression Free Survival (PFS) in the intent to treat (ITT) population |

### 2.2 Background & Rationale

The purpose of this study is to measure the efficacy and safety of rilvegostomig with gemcitabine plus cisplatin vs. durvalumab with gemcitabine plus cisplatin as first line treatment for patients with advanced BTC.

## 3. Study Design & Methodology

|                   |                                                                 |
|-------------------|-----------------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE3, Status: NOT_YET_RECRUITING |
| Target N:         | 1100                                                            |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

|             |                    |
|-------------|--------------------|
| Primary ID: | 883681623994575647 |
|-------------|--------------------|

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

**Registry Number:** NCT07221253

**Sponsor:** AstraZeneca

**Study Title:** A Study of Rilvegostomig or Durvalumab Plus Chemotherapy for First-Line Treatment of Biliary Tract Cancer (ARTEMIDE-Biliary02)

## 15. Sign-off & Approval

Principal Investigator: \_\_\_\_\_ Date: \_\_\_\_\_

Clinical Operations Lead: \_\_\_\_\_ Date: \_\_\_\_\_

Lead Statistician: \_\_\_\_\_ Date: \_\_\_\_\_
