

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Open-Label, Multicenter, Tumor-agnostic Study of MK-1084 as Monotherapy and in Combination With Cetuximab, in Participants With KRAS G12C-Mutant, Advanced Solid Tumors (KANDLELIT-014)
Short Title:	A Clinical Study of MK-1084 in People With Advanced Solid Tumors (MK-1084-014)
Protocol Number:	1117907791746329990
NCT Number:	NCT07209111
Sponsor Name:	Merck
Investigational Product:	cetuximab
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Objective Response Rate (ORR): ORR is defined as the percentage of participants with Complete Response (CR: disappearance of all target lesions) or Partial Response (PR: at least a 30% decrease in the sum of diameters of target lesions) per Response Evaluation Criteria In Solid Tumors Version 1.1 (RECIST 1.1). The percentage of participants who experience CR or PR as assessed by Blinded Independent Central Review (BICR) will be presented. 2. Number of Participants Who Experience One or More Adverse Events (AEs): An AE is defined as any unfavorable and unintended sign, symptom, disease, or worsening of preexisting condition temporally associated with study treatment and irrespective of causality to study treatment. The number of participants who experience an AE will be reported. 3. Number of Participants Who Discontinue Study Treatment Due to an AE: An AE is defined as any unfavorable and unintended sign, symptom, disease, or worsening of preexisting condition temporally associated with study treatment and irrespective of causality to study treatment. The number of participants who discontinue study treatment due to an AE will be reported.
Secondary Obj.:	1. Progression-free Survival (PFS) 2. Duration of Response (DOR) 3. Overall Survival (OS)

2.2 Background & Rationale

Researchers want to learn if MK-1084 given alone or with cetuximab can treat certain advanced solid tumors in people with the KRAS G12C mutation.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: NOT_YET_RECRUITING
Target N:	150

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

- * Has locally advanced unresectable or metastatic solid tumor malignancy other than colorectal cancer and has progressed on, or following, standard of care systemic treatment
- * Has a tumor that demonstrates the presence of Kirsten rat sarcoma (KRAS) G12C mutation

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * Has uncontrolled, significant cardiovascular disease or cerebrovascular disease
- * Has known additional malignancy that is progressing or has required active treatment within the past 3 years
- * Has known active central nervous system metastases and/or carcinomatous meningitis and/or primary brain tumors
- * Has active infection, other than those permitted per protocol, requiring systemic therapy
- * Has not adequately recovered from major surgery or has ongoing surgical complications

11. Study Identifiers & Governance

Primary ID: 1117907791746329990
Registry Number: NCT07209111
Sponsor: Merck
Study Title: A Clinical Study of MK-1084 in People With Advanced Solid Tumors (MK-1084-014)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
