

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2 Clinical Trial of Nivolumab, or Nivolumab Combinations in Recurrent and Metastatic Microsatellite Instability High (MSI-H) and Non-MSI-H Colon Cancer
Short Title:	A Study of Nivolumab Alone or Nivolumab Combination Therapy in Colon Cancer That Has Come Back or Has Spread
Protocol Number:	122988495005327265
NCT Number:	NCT02060188
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	ipilimumab
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Objective Response Rate (ORR) by Response Evaluation Criteria in Solid Tumors (RECIST) v1.1 Per Investigator Assessment: Objective Response Rate (ORR) is defined as the number of randomized participants who achieve a best overall response (BOR) of confirmed complete response (CR) or confirmed partial response (PR), based on investigator assessments [using Response Evaluation Criteria in Solid Tumors (RECIST) v1.1], divided by the number of all randomized participants. Complete Response (CR): Disappearance of all target lesions. Any pathological lymph nodes (whether target or non-target) must have reduction in short axis to ≤ 10 mm. Partial Response (PR): At least a 30% decrease in the sum of diameters of target lesions, taking as reference the baseline sum diameters.
Secondary Obj.:	1. Objective Response Rate (ORR) by Response Evaluation Criteria in Solid Tumors (RECIST) v1.1 Per Independent Review Committee (IRC)

2.2 Background & Rationale

The purpose of this study is to examine if Nivolumab by itself, or Nivolumab in combination with other anti-cancer drugs, will result in meaningful tumor size reduction, in participants with colon cancer that has come back or has spread, and who have a specific biomarker in their tumors.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: COMPLETED
Target N:	385

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Eastern Cooperative Oncology Group (ECOG) performance status of 0 to 1
- * Histologically confirmed recurrent or metastatic colorectal cancer
- * Measurable disease per RECIST v1.1
- * Microsatellite instability expression detected by an accredited laboratory
- * Participants enrolled into the C3 Cohort must have not had treatment for their metastatic disease

4.2 Exclusion Criteria

- * Active brain metastases or leptomeningeal metastases are not allowed
- * Prior treatment with an anti-Programmed Death Receptor (PD)-1, anti-PD-L1, anti-PD-L2, anti-Cytotoxic T-Cell Lymphoma-4 Antigen (CTLA-4) antibody, or any other antibody or drug specifically targeting T-cell co-stimulation or immune checkpoint pathways
- * Prior malignancy active within the previous 3 years except for locally curable cancers
- * Participants with active, known or suspected autoimmune disease
- * Participants with a condition requiring systemic treatment with either corticosteroids or other immunosuppressive medications within 14 days of study drug administration

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 122988495005327265

Registry Number: NCT02060188

Sponsor: Bristol Myers Squibb

Study Title: A Study of Nivolumab Alone or Nivolumab Combination Therapy in Colon Cancer That Has Come Back or Has Spread

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
