

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Multicenter, Double-blind, Extension Study to Evaluate the Effects of Sotatercept for the Treatment of Combined Postcapillary and Precapillary Pulmonary Hypertension (Cpc-PH) Due to Heart Failure With Preserved Ejection Fraction (HFpEF)
Short Title:	Extension Study of Sotatercept in People With Pulmonary Hypertension (MK-7962-023)
Protocol Number:	318369212856179960
NCT Number:	NCT06814145
Sponsor Name:	Merck
Investigational Product:	Sotatercept
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants Who Experience an Adverse Event (AE): An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention. The number of participants who experience an AE will be reported. 2. Number of Participants Who Discontinue Study Treatment Due to an AE: An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention. The number of participants who discontinue study treatment due to an AE will be reported.
Secondary Obj.:	1. Change From Baseline in Pulmonary Vascular Resistance (PVR) at Week 48 2. Change From Baseline in the 6-Minute Walk Distance (6MWD) at Week 48 3. Change From Baseline in the 6MWD at Week 126

2.2 Background & Rationale

Researchers are looking for new ways to treat people with a type of pulmonary hypertension called combined postcapillary and precapillary pulmonary hypertension (Cpc-PH). This study focuses on Cpc-PH that is caused by heart failure with preserved ejection fraction (HFpEF).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	130

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

↳ Completed MK-7962-007 (CADENCE) (Visit 9 and end of treatment \[EOT\] visit) without discontinuing study intervention and is able to safely enroll into MK-7962-007 (HARMONIZE)

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * Has a diagnosis of pulmonary hypertension (PH) in world health organization (WHO) Group 1, WHO Group 3, WHO Group 4, or WHO Group 5
- * Has had a study intervention interruption
- * Is pregnant or breastfeeding
- * Has chronic liver disease with severe hepatic impairment and/or cirrhosis (eg, hepatic encephalopathy)
- * Anticipation of more than 1 valve replacement or repair (mechanical or biomechanical) and/or have undergone more than 1 valve replacement or repair
- * Has severe tricuspid regurgitation due to primary valvular disease (eg, from endocarditis, carcinoid, or mechanical destruction)
- * Anticipated or undergone heart transplant or ventricular assist device implantation
- * Has had prior exposure to luspatercept

11. Study Identifiers & Governance

Primary ID:	318369212856179960
Registry Number:	NCT06814145
Sponsor:	Merck
Study Title:	Extension Study of Sotatercept in People With Pulmonary Hypertension (MK-7962-023)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
