

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Multicenter, Open-Label Study of CC-97540 (BMS-986353), CD19-Targeted NEX-T Chimeric Antigen Receptor (CAR) T Cells, in Participants With Active SLE (Including Lupus Nephritis) With Inadequate Response to Glucocorticoids and at Least 2 Immunosuppressants
Short Title:	A Study of CC-97540 (BMS-986353), CD19-Targeted NEX-T CAR T Cells, in Participants With Active SLE Despite Immunosuppressants (Breakfree-SLE)
Protocol Number:	60938916653917292
NCT Number:	NCT07015983
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	cyclophosphamide
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Proportion of participants achieving drug-free Definition of Remission in Systemic Lupus Erythematosus (DORIS) remission
Secondary Obj.:	1. Complete renal response (CRR) for participants with baseline lupus nephritis (LN) 2. Participants with drug-free DORIS remission 3. CRR for participants with baseline LN

2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy, safety and drug levels of CC-97540 in participants with active systemic lupus erythematosus (SLE) including lupus nephritis with inadequate response to glucocorticoids and at least 2 immunosuppressants.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	89

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

- * Participants must not have other diseases, conditions, or treatments that may confound interpretation of the effects of CC-97540 in SLE.
- * Uncontrolled or clinically significant cardiovascular conditions or CNS pathology participants must not have prior

history of malignancies or lymphoproliferative disease, unless the participant has been free of the disease for ? 2 years, except for some non-invasive malignancies.

* IOCBP who are pregnant, nursing, or breastfeeding, or who intend to become pregnant during participation in the study.

* Participants must not have prior treatment with CAR T cell therapy, genetically modified T cell therapy, or stem cell transplant. Washout periods may be required.

* Participants must not have received live vaccines within 6 weeks before CC-97540 administration.

* Participant must not have inadequate organ function.

* Other protocol defined inclusion/exclusion criteria apply.

11. Study Identifiers & Governance

Primary ID: 60938916653917292

Registry Number: NCT07015983

Sponsor: Bristol Myers Squibb

Study Title: A Study of CC-97540 (BMS-986353), CD19-Targeted NEX-T CAR T Cells, in Participants With Active SLE Despite Immunosuppressants (Breakfree-SLE)
