

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Randomized, Double-Blind Phase 2/3 Study of Relatlimab Combined With Nivolumab Versus Nivolumab in Participants With Previously Untreated Metastatic or Unresectable Melanoma
Short Title:	A Study of Relatlimab Plus Nivolumab Versus Nivolumab Alone in Participants With Advanced Melanoma
Protocol Number:	679471553948741389
NCT Number:	NCT03470922
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	nivolumab
Phase:	PHASE2, PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: 1. Progression Free Survival (PFS): Progression Free Survival (PFS) is defined as the time between the date of randomization and the date of first documented tumor progression, assessed by a blinded independent central review (BICR) (per RECIST v1.1 criteria), or death due to any cause, whichever occurs first. Subjects who die without a reported progression will be considered to have progressed on the date of their death.

Secondary Obj.: 1. Overall Survival (OS) 2. Overall Response Rate (ORR)

2.2 Background & Rationale

The purpose of this study is to determine whether relatlimab in combination with nivolumab is more effective than nivolumab monotherapy in treating unresectable melanoma or melanoma that has spread.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL,	Phase: PHASE2,	PHASE3,	Status:
	ACTIVE_NOT_RECRUITING			
Target N:	714			

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participants must have histologically confirmed Stage III (unresectable) or Stage IV melanoma, per the AJCC staging system
- * Participants must not have had prior systemic anticancer therapy for unresectable or metastatic melanoma

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Tumor tissue from an unresectable or metastatic site of disease must be provided for biomarker analyses

4.2 Exclusion Criteria

* Participants must not have active brain metastases or leptomeningeal metastases

* Participants must not have uveal melanoma

* Participants must not have an active, known, or suspected autoimmune disease

Other protocol defined inclusion/exclusion criteria could apply

11. Study Identifiers & Governance

Primary ID: 679471553948741389

Registry Number: NCT03470922

Sponsor: Bristol Myers Squibb

Study Title: A Study of Relatlimab Plus Nivolumab Versus Nivolumab Alone in Participants With Advanced Melanoma
