

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A GLOBAL PHASE 2/3 INTERVENTIONAL STUDY OF PF-08634404 IN COMBINATION WITH CHEMOTHERAPY IN PARTICIPANTS WITH EXTENSIVE STAGE SMALL CELL LUNG CANCER
Short Title:	A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Extensive-Stage Small Cell Lung Cancer
Protocol Number:	799730124609028324
NCT Number:	NCT07226999
Sponsor Name:	Pfizer
Investigational Product:	atezolizumab
Phase:	PHASE2, PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Phase 2: Confirmed Objective Response Rate (ORR) per Response Evaluation Criteria in Solid Tumors version 1.1 [RECIST 1.1] based on the investigator's assessment: Defined as the proportion of participants in whom a confirmed complete response (CR) or partial response (PR) is observed as best overall response. ORR using RECIST v1.1 as assessed by investigator. 2. Phase 2: Number of participants with treatment-emergent adverse events: Adverse Events (AEs) as characterized by type, frequency, severity (as graded by NCI CTCAE version 5.0), timing, seriousness, and relationship to study intervention. 3. Phase 3: Overall Survival (OS): OS is defined as the time from the date of randomization to the date of death due to any cause. OS is secondary outcome measure in Phase 2 portion of the study.
Secondary Obj.:	1. Duration of Response (DOR) as assessed by Investigator based on RECIST v1.1 2. Progression Free Survival (PFS) as assessed by investigator based on RECIST v1.1 3. Number of participants with Laboratory abnormalities

2.2 Background & Rationale

This study is being done to learn more about a new medicine called PF-08634404 and how well it works when given with chemotherapy to adults with extensive-stage small cell lung cancer (ES-SCLC), a fast-growing type of lung cancer that has spread widely in the body.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL,	Phase: PHASE2, PHASE3,	Status: NOT_YET_RECRUITING
Target N:	550		

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Histologically or cytologically confirmed extensive-stage small cell lung cancer (ES-SCLC).
- * Participants have not received systemic therapy (chemotherapy, radiotherapy, chemoradiation) for ES-SCLC.
- * Treatment-free for at least 6 months since last chemo/radiotherapy, among those treated (with curative intent) with prior chemo/radiotherapy for limited-stage SCLC
- * Have at least one measurable lesion as the targeted lesion based on RECIST V1.1.
- * Eastern Cooperative Oncology Group performance status of 0 or 1.
- * Adequate organ function

4.2 Exclusion Criteria

- * known active CNS lesions, including brainstem, meningeal, or spinal cord metastases or compression
- * Leptomeningeal disease
- * Clinically significant risk of hemorrhage or fistula
- * history of another malignancy within 3 years
- * active autoimmune diseases requiring systemic treatment within the past 2 years

11. Study Identifiers & Governance

Primary ID:	799730124609028324
Registry Number:	NCT07226999
Sponsor:	Pfizer
Study Title:	A Study to Learn About the Study Medicine Called PF-08634404 in Combination With Chemotherapy in Adult Participants With Extensive-Stage Small Cell Lung Cancer

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
