

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase II Open Label Randomised Comparative Multicentre Study to Compare the Efficacy and Tolerability of Olaparib in Combination With Paclitaxel and Carboplatin Versus Paclitaxel and Carboplatin Alone in Patients With Platinum Sensitive Advanced Serous Ovarian Cancer
Short Title:	Study to Compare the Efficacy and Safety of Olaparib When Given in Combination With Carboplatin and Paclitaxel, Compared With Carboplatin and Paclitaxel in Patients With Advanced Ovarian Cancer
Protocol Number:	1065164384493657566
NCT Number:	NCT01081951
Sponsor Name:	AstraZeneca
Investigational Product:	carboplatin
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression Free Survival (PFS): PFS (based on independent central review) was defined as the time from randomisation until objective disease progression as defined by Response Evaluation Criteria In Solid Tumours (RECIST) v1.1 (?20% increase in the sum of the diameters of target lesions from minimum, clinically significant progression in non-target lesions or the presence of a new lesion) or death (by any cause in the absence of progression).
Secondary Obj.:	1. Overall Survival (OS) 2. Percentage Change in Tumour Size

2.2 Background & Rationale

To compare the efficacy of olaparib in combination with paclitaxel and carboplatin (AUC4) when compared with carboplatin (AUC6) and paclitaxel alone in patients with advanced ovarian cancer.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: ACTIVE_NOT_RECRUITING
Target N:	162

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Diagnosed with serous ovarian cancer
- * Patients who have received no more than 3 previous platinum containing treatments and were progression free for at

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

least 6 months following the end of the last platinum treatment

* At least one lesion that is suitable for accurate repeated measurements

4.2 Exclusion Criteria

* Patients receiving any systemic anticancer chemotherapy, radiotherapy (except palliative) within two weeks from the last dose prior to study treatment

* Hypersensitivity to pre medications required for treatment with paclitaxel/carboplatin

11. Study Identifiers & Governance

Primary ID: 1065164384493657566

Registry Number: NCT01081951

Sponsor: AstraZeneca

Study Title: Study to Compare the Efficacy and Safety of Olaparib When Given in Combination With Carboplatin and Paclitaxel, Compared With Carboplatin and Paclitaxel in Patients With Advanced Ovarian Cancer
