

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Multicenter, Open-label Study to Evaluate the Efficacy and Safety of Trastuzumab Deruxtecan (T-DXd, DS-8201a) for the Treatment of Selected HER2 Expressing Tumors (DESTINY-PanTumor02)
Short Title:	A Phase 2 Study of T-DXd in Patients With Selected HER2 Expressing Tumors
Protocol Number:	383008196283436816
NCT Number:	NCT04482309
Sponsor Name:	AstraZeneca
Investigational Product:	trastuzumab deruxtecan
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Objective Response Rate (ORR): Confirmed ORR per RECIST 1.1 is the percentage of patients with Complete Response or Partial Response that is subsequently confirmed.
Secondary Obj.:	1. Duration of response (DoR) 2. Disease control rate (DCR) 3. Progression free survival (PFS)

2.2 Background & Rationale

This is an open-label, multi-center, multi-cohort, Phase 2 study to evaluate the efficacy and safety of trastuzumab deruxtecan (T-DXd) for the treatment of selected HER2-expressing tumors.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	468

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Locally advanced, unresectable, or metastatic disease based on most recent imaging.
- * Part 1: The respective cohorts for patient inclusion are:
 - * Cohort 1: Biliary tract cancer
 - * Cohort 2: Bladder cancer
 - * Cohort 3: Cervical cancer
 - * Cohort 4: Endometrial cancer

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Cohort 5: Epithelial ovarian cancer
- * Cohort 6: Pancreatic cancer
- * Cohort 7: Rare tumors: This cohort will consist of patients with tumors that express HER2, excluding the tumors mentioned above, and breast, non-small cell lung cancer, gastric cancer, and colorectal cancer.
- * Part 2: The respective cohorts for patient inclusion are:
 - * Cohort A: Metastatic or advanced solid tumors that are HER2 IHC 3+ (excluding breast, gastric cancer, and colorectal cancer). Patients with non-small cell lung cancer can be included.
 - * Cohort B: Metastatic or advanced solid tumors that are HER2 IHC 2+/ $\geq$ ISH+ any tumor type (excluding breast, gastric cancer, and colorectal cancer). Patients with non-small cell lung cancer can be included.
 - * Cohort C: Metastatic or advanced solid endometrial cancer that is HER2 IHC 2+ or 1+.
 - * Cohort D: Metastatic or advanced ovarian cancer that is HER2 IHC 2+ or 1+.
 - * Cohort E: Metastatic or advanced solid cervical cancer that is HER2 IHC 2+ or 1+.
- * Progressed following prior treatment or who have no satisfactory alternative treatment option.
- * Prior HER2 targeting therapy is permitted.
- * HER2 expression scored using current ASCO/CAP guidelines for scoring HER2 for gastric cancer.
- * Part 1: IHC 3+ or IHC 2+ by local or central assessment
- * Part 2: IHC and ISH results by central assessment as pre-defined for each cohort
- * Has measurable target disease assessed by the Investigator based on RECIST version 1.1.
- * Has protocol-defined adequate organ function including cardiac, renal and hepatic function.

4.2 Exclusion Criteria

- * History of non-infectious pneumonitis/ILD that required steroids, current ILD, or where suspected ILD that cannot be ruled out by imaging at screening
- * Lung-specific intercurrent clinically significant severe illnesses
- * Uncontrolled infection requiring intravenous (IV) antibiotics, antivirals, or antifungals
- * Pleural effusion, ascites or pericardial effusion that requires drainage, peritoneal shunt, or Cell-free and Concentrated Ascites Reinfusion Therapy (CART)
- * Known Somatic DNA mutation of HER2 (ERBB2) without tumoral HER2 protein expression.
- * Primary diagnosis of adenocarcinoma of the breast, adenocarcinoma of the colon or rectum, adenocarcinoma of the gastric body or gastro-esophageal junction, or non-small cell lung cancer for Part 1. For Part 2, patients with primary diagnosis of adenocarcinoma of the breast, adenocarcinoma of the colon or rectum, adenocarcinoma of the gastric body or gastro-esophageal junction will be excluded.
- * Medical conditions that may interfere with the subject's participation in the study.

11. Study Identifiers & Governance

Primary ID:	383008196283436816
Registry Number:	NCT04482309
Sponsor:	AstraZeneca
Study Title:	A Phase 2 Study of T-DXd in Patients With Selected HER2 Expressing Tumors
