

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open-Label, Multi-Drug, Multi-Centre, Phase II Study to Evaluate the Efficacy, Safety, Tolerability, Pharmacokinetics, and Immunogenicity of Novel Combinations in Participants With Locally Advanced Unresectable or Metastatic Gastric or Gastroesophageal Junction Adenocarcinoma
Short Title:	Novel Combinations in Participants With Locally Advanced Unresectable or Metastatic Gastric or Gastroesophageal Junction Adenocarcinoma
Protocol Number:	564919878184412695
NCT Number:	NCT05702229
Sponsor Name:	AstraZeneca
Investigational Product:	fluorouracil
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. ORR (per RECIST 1.1 as assessed by Investigator): the proportion of participants who have a confirmed complete response or confirmed partial response, as determined by the Investigator at local site per RECIST 1.1. 2. PFS6 (per RECIST 1.1 as assessed by Investigator): the proportion of participants alive and progression-free at 6 months.
Secondary Obj.:	1. PFS per RECIST 1.1 as assessed by the Investigator 2. OS 3. other safety related endpoints

2.2 Background & Rationale

This is a Phase II, open-label, multi-drug, multi-centre study designed to assess the efficacy, safety, tolerability, pharmacokinetics, and immunogenicity of novel combination therapies in participants with locally advanced unresectable or metastatic gastric or GEJ adenocarcinoma.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	240

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * 18 years or older at the time of signing the ICF.
- * Body weight $\geq$ 35 kg.
- * Previously untreated for unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Has measurable target disease assessed by the Investigator based on RECIST 1.1.
- * ECOG PS zero or one.
- * Life expectancy of at least 12 weeks.
- * Adequate organ and bone marrow function.
- * Has central lab confirmed Claudin18.2 status at screening from archival tumour collected within past 24 months or from a fresh biopsy when Substudy 3, Substudy 4 or Substudy 6 is open for recruitment.

4.2 Exclusion Criteria

- * Participants with HER2-positive (3+ by IHC, or 2+ by IHC and positive by in situ hybridisation) or indeterminate gastric or GEJ carcinoma.
- * Untreated or progressive CNS metastatic disease, any leptomeningeal disease, or cord compression.
- * Participants with ascites which cannot be controlled with appropriate interventions.
- * Active infectious diseases, including tuberculosis, HIV infection, or hepatitis A/B/C.
- * Uncontrolled intercurrent illness.
- * Active or prior documented autoimmune or inflammatory disorders requiring systemic treatment with steroids or other immunosuppressive treatment.
- * History of another primary malignancy.
- * Previous treatment with an immune-oncology agent.
- * Previous treatment with any modalities of Claudin18.2 target therapy or MMAE exposure (when Substudy 3, Substudy 4, or Substudy 6 is open for recruitment).

11. Study Identifiers & Governance

Primary ID:	564919878184412695
Registry Number:	NCT05702229
Sponsor:	AstraZeneca
Study Title:	Novel Combinations in Participants With Locally Advanced Unresectable or Metastatic Gastric or Gastroesophageal Junction Adenocarcinoma

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
