

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Phase I/II, Open Label, Multicenter Study of Rapcabtagene Autoleucel in Adult Patients With CLL/SLL, 3L+ DLBCL, r/r ALL and 1L HR LBCL
Short Title:	Phase I/II Study of Rapcabtagene Autoleucel in CLL, 3L+ DLBCL, r/r ALL and 1L HR LBCL
Protocol Number:	624142759273622627
NCT Number:	NCT03960840
Sponsor Name:	Novartis
Investigational Product:	ibrutinib
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Phase 1: Dose recommendation: Incidence and nature of Dose Limiting Toxicities (Dose Escalation part only) 2. Phase 1: Safety: Incidence and severity of AEs and SAEs, including changes in laboratory values, ECG and vital signs 3. Phase 1: Tolerability: Ibrutinib dose modifications in the CLL/SLL arm
Secondary Obj.:	1. Phase 1: Complete Response (CR)/Partial Response (CR) in CLL/SLL 2. Phase 1: BOR of CR/PR per Lugano criteria in 3L+ DLBCL 3. Phase 1: Duration of response (DOR) in CLL/SLL and 3L+ DLBCL

2.2 Background & Rationale

This is a phase I/II study to evaluate the feasibility, safety and preliminary antitumor efficacy of rapcabtagene autoleucel (also known as YTB323). Rapcabtagene autoleucel will be investigated in combination with ibrutinib in chronic lymphocytic leukemia (CLL)/small lymphocytic lymphoma (SLL) and as single agent in diffuse large B-cell lymphoma (3L+ DLBCL), adult acute lymphoblastic leukemia (ALL) and 1st Line High Risk Large B-Cell Lymphoma (1L HR LBCL).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL,	Phase: PHASE1, PHASE2,	Status: ACTIVE_NOT_RECRUITING
Target N:	216		

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * ECOG performance status 0-1 for ALL and DLBCL
- * ECOG performance status 0-2 for 1L HR LBCL at screening

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * CLL or SLL diagnosis according to iwCLL criteria
- * CLL/SLL in SD or PR after at least 6 months of ibrutinib, either as second or subsequent line of therapy
- * DLBCL diagnosis by local histopathology
- * DLBCL relapsed or refractory after 2 or more lines of therapy, including autologous hematopoietic stem cell transplantation (HSCT)
- * Refractory or relapsed CD19-positive ALL
- * ALL with morphologic disease in the bone marrow

1L HR LBCL - Considered to be high-risk based on at least 1 of the following at diagnosis:

- * IPI score of 3, 4 or 5
- * MYC and BCL2 and/or BCL6 rearrangement (DH/TH lymphoma)
- * Participants must have received 2 cycles of frontline therapy for LBCL with R-CHOP or Pola-R-CHP or DA-EPOCH-R. Participants with DH/TH lymphoma must have received at least one cycle (the most recent) DA-EPOCH-R.
- * Participants must have a positive PET per Lugano classification (Deauville PET score of 4 or 5 and an overall response of PR/SD) after 2 cycles of frontline CIT. Note: Patient's with Deauville PET score of 5 and overall response of PD, or with Deauville PET score of 1, 2, or 3 and overall response of CR, are not eligible for this trial.

4.2 Exclusion Criteria

- * Prior CD19-directed therapy
- * Prior administration of a genetically engineered cellular product
- * Prior allogeneic HSCT
- * Richter's transformation
- * For 1L HR LBCL: Richter's transformation, Burkitt lymphoma, primary DLBCL of CNS, DLBCL associated with chronic inflammation, intravascular large B-cell lymphoma, ALK- positive large B-cell lymphoma, HHV8 positive LBCL, DLBCL leg type or EBV positive DLBCL, NOS.
- * Active CNS lymphoma
- * For 1L HR LBCL: Active or prior history CNS involvement by malignancy
- * Targeted small molecule or kinase inhibitor within 2 weeks from leukapheresis

Other protocol-defined inclusion/exclusion may apply.

11. Study Identifiers & Governance

Primary ID:	624142759273622627
Registry Number:	NCT03960840
Sponsor:	Novartis
Study Title:	Phase I/II Study of Rapcabtagene Autoleucel in CLL, 3L+ DLBCL, r/r ALL and 1L HR LBCL

Clinical Study Summary Report (CSSR)
