

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1/2 Study of BMS-986253 in Combination With Nivolumab or Nivolumab Plus Ipilimumab in Advanced Cancers
Short Title:	A Study of BMS-986253 in Combination With Nivolumab or Nivolumab Plus Ipilimumab in Advanced Cancers
Protocol Number:	678672725820664972
NCT Number:	NCT03400332
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	ipilimumab
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants Experiencing Adverse Events (AEs) - Part 1: An Adverse Event (AE) is defined as any new untoward medical occurrence or worsening of a pre-existing medical condition in a clinical investigation participant administered study treatment and that does not necessarily have a causal relationship with this treatment. Adverse events are graded on a scale from 1 to 5, with Grade 1 being mild and asymptomatic; Grade 2 is moderate requiring minimal, local or noninvasive intervention; Grade 3 is severe or medically significant but not immediately life-threatening; Grade 4 events are usually severe enough to require hospitalization; Grade 5 events are fatal. This endpoint was prespecified in the protocol to include only participants in Part 1. 2. Number of Participants Experiencing Serious Adverse Events (SAEs) - Part 1: A serious adverse event is defined as any untoward medical occurrence that, at any dose: results in death, is life-threatening, requires inpatient hospitalization or causes prolongation of existing hospitalization, results in persistent or significant disability/incapacity, is a congenital anomaly/birth defect, is an important medical event. This endpoint was prespecified in the protocol to include only participants in Part 1. 3. Number of Participants Experiencing Dose Limiting Toxicities (DLTs) - Part 1: Dose-Limiting Toxicities (DLTs) are effects of a treatment that are serious enough to prevent an increase in dose of that treatment, as advised by the Dose Review Team. DLTs will be defined based on the incidence, intensity, and duration of AEs that are possibly related to study treatment. DLTs will include gastrointestinal, hepatic, hematologic, dermatologic, and other AEs.
--------------------	--

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

This endpoint was prespecified in the protocol to include only participants in Part 1.

Secondary Obj.: 1. Objective Response Rate (ORR) - Part 1 2. Duration of Response (DOR) - Part 1 3. Maximum Concentration (Cmax) - Part 1

2.2 Background & Rationale

The purpose of this study is to investigate experimental medication BMS-986253 in combination with Nivolumab or Nivolumab plus Ipilimumab in participants with advanced cancers.

3. Study Design & Methodology

Design Framework: Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: ACTIVE_NOT_RECRUITING

Target N: 281

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Histologic or cytologic confirmation of a solid tumor that is advanced (metastatic, recurrent and/or unresectable) with measurable disease per RECIST v1.1
- * At least 1 lesion accessible for biopsy
- * Eastern Cooperative Oncology Group Performance Status of 0 or 1

4.2 Exclusion Criteria

- * Participants with CNS metastases as the only site of active disease (Participants with controlled brain metastases; however, will be allowed to enroll)
- * Participants with active, known or suspected autoimmune disease
- * Participants with conditions requiring systemic treatment with either corticosteroids (> 10mg prednisone equivalents) or other immunosuppressive medications within 14 days of study treatment administration
- * Participants with a known history of testing positive for Human Immunodeficiency Virus (HIV) or known Acquired Immunodeficiency Syndrome (AIDS)
- * Cytotoxic agents, unless at least 4 weeks have elapsed from last dose of prior anti-cancer therapy and initiation of study therapy

Other protocol defined inclusion/exclusion criteria could apply

11. Study Identifiers & Governance

Primary ID: 678672725820664972

Registry Number: NCT03400332

Sponsor: Bristol Myers Squibb
