

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1/2 Study to Evaluate the Safety and Efficacy of MK-2870 Monotherapy or in Combination With Other Anticancer Agents in Gastrointestinal Cancers
Short Title:	A Clinical Study of MK-2870 Alone or With Other Treatments to Treat Gastrointestinal Cancers (MK-9999-02A)
Protocol Number:	695125335035779127
NCT Number:	NCT06428409
Sponsor Name:	Merck
Investigational Product:	cisplatin
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants Who Experience a Dose-limiting Toxicity (DLT): A DLT is a medical problem related to the study medicine that prevents giving participants a higher dose or may prevent giving the participant the same dose. The number of participants who experience a DLT will be reported. 2. Number of Participants Who Experience One or More Adverse Events (AEs): An AE is a health problem that happens or worsens during the study. The number of participants who have an AE during the study will be reported. 3. Number of Participants who Discontinue Study Treatment due to an AE: An AE is a health problem that happens or worsens during a study. The number of participants who stop study treatment will be reported.
Secondary Obj.:	1. Duration of Response (DOR) per RECIST 1.1 as Assessed by BICR 2. Progression-free Survival (PFS) per RECIST 1.1 as Assessed by BICR 3. Overall Survival (OS)

2.2 Background & Rationale

Researchers want to learn if sacituzumab tirumotecan (MK-2870) alone or with other treatments can treat certain gastrointestinal (GI) cancers. The GI cancers being studied are either advanced (the cancer has spread to other parts of the body), or unresectable (the cancer cannot be removed with surgery). The goals of this study are to learn:

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N:	180

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

* Has one of the following cancers:

- * Unresectable or metastatic colorectal cancer and has received prior therapy for the cancer
- * Advanced or metastatic pancreatic ductal adenocarcinoma (PDAC) and has received prior therapy for the cancer
- * Advanced and/or unresectable biliary tract cancer (BTC) and has received prior therapy for the cancer
- * Advanced and/or unresectable BTC and has not received prior therapy for the cancer
- * For participants who have received prior therapy for cancer: Has recovered from any side effects due to previous cancer treatment

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * History of severe eye disease
- * For participants who have received prior therapy for cancer: Received prior systemic anticancer therapy including investigational agents within 4 weeks before starting study intervention
- * History of (noninfectious) pneumonitis/interstitial lung disease that required steroids or has current pneumonitis/interstitial lung disease

11. Study Identifiers & Governance

Primary ID:	695125335035779127
Registry Number:	NCT06428409
Sponsor:	Merck
Study Title:	A Clinical Study of MK-2870 Alone or With Other Treatments to Treat Gastrointestinal Cancers (MK-9999-02A)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
