

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Prospective, Open-Label, Single-Arm, Phase II Study of Acalabrutinib and Rituximab in Untreated Elderly and/or Frail Patients With Diffuse Large B-Cell Lymphoma (ACRUE)
Short Title:	Study of Acalabrutinib and Rituximab in Untreated Elderly and/or Frail Patients With DLBCL
Protocol Number:	76468885591484880
NCT Number:	NCT05952024
Sponsor Name:	AstraZeneca
Investigational Product:	rituximab
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of patients with Grade 3 to 4 treatment emergent adverse events (TEAEs)
Secondary Obj.:	1. Objective response rate (ORR) 2. Progression free survival (PFS) 3. Event-Free Survival (EFS)

2.2 Background & Rationale

The study will measure the safety, tolerability, and efficacy with acalabrutinib in combination with rituximab in treatment-naïve elderly and/or frail patients with diffuse large B-cell lymphoma (DLBCL), who are otherwise unsuitable for standard front line chemoimmunotherapy treatments.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	80

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * ? 80 years of age at the time of screening, or
- * ? 65 to 79 years of age at the time of screening and considered ineligible for chemoimmunotherapy
- * Histologically documented DLBCL
- * No prior treatment for DLBCL
- * Stage II, III, or IV disease by the Ann Arbor Classification .
- * Eastern Cooperative Oncology Group performance status of 0, 1, or 2 with no deterioration over the previous 2 weeks

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

prior to baseline or day of the first dosing except when due to underlying lymphoma.

- * At least 1 lesion that can be accurately measured at baseline as ≥ 10 mm in the longest diameter with computed tomography or magnetic resonance imaging and is suitable for accurate repeated measurements.
- * Adequate organ and marrow function independent of growth factor or transfusion support within 1 week of Screening.

4.2 Exclusion Criteria

- * Any evidence of diseases (such as severe or uncontrolled systemic diseases, including uncontrolled hypertension, renal transplant, and active bleeding diseases), that would make the study undesirable for the patient or that would impact compliance with the protocol.
- * History of prior or current malignancy, that would affect compliance with the protocol or interpretation of the results.
- * Serologic status reflecting active hepatitis B or C infection.
- * Serological positivity or known infection with HIV.
- * Active central nervous system involvement by lymphoma, leptomeningeal disease, or spinal cord compression.
- * Any comorbidity or organ system impairment rated with a single Cumulative Illness Rating Scale-Geriatric score (CIRS-G) of 4 or a total CIRS-G score of ≥ 17 .
- * History of or ongoing confirmed Progressive Multifocal Leukoencephalopathy.
- * Known active significant infection.
- * History of stroke or intracranial haemorrhage within 6 months before the first dose of study drug.
- * History of bleeding diathesis (eg, haemophilia, von Willebrand disease).
- * Major surgical procedure within 30 days of first dose of study intervention or anticipated major surgery during the study timeframe.
- * Requires or receiving anticoagulation with warfarin or equivalent vitamin K antagonists.
- * Received a live virus vaccination within 28 days of the first dose of study drug.

11. Study Identifiers & Governance

Primary ID:	76468885591484880
Registry Number:	NCT05952024
Sponsor:	AstraZeneca
Study Title:	Study of Acalabrutinib and Rituximab in Untreated Elderly and/or Frail Patients With DLBCL

15. Sign-off & Approval
