

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A PHASE 1b/2, OPEN-LABEL STUDY OF PF-07901801 IN COMBINATION WITH GLOFITAMAB AFTER A FIXED, SINGLE DOSE OF OBINUTUZUMAB IN PARTICIPANTS WITH RELAPSED/REFRACTORY DIFFUSE LARGE B CELL LYMPHOMA NOT ELIGIBLE FOR STEM CELL TRANSPLANTATION
Short Title:	A Study to Learn About the Effects of Two Study Medicines (Maplirpacept [PF-07901801] And Glofitamab) When Given Together In People With Relapsed Or Refractory Diffuse Large B Cell Lymphoma.
Protocol Number:	962057060083113980
NCT Number:	NCT05896163
Sponsor Name:	Pfizer
Investigational Product:	obinutuzumab
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Phase 1b: Number of participants with Dose limiting toxicities (DLT): DLTs are a predefined set of adverse events that are at least possibly related to any or all of the investigational agents. 2. Phase 2: Objective Response (OR): OR defined as proportion of participants with objective response based assessment of complete response (CR) or partial response (PR) according to Lugano Response Classification Criteria 2014.
Secondary Obj.:	1. Phase 1b and Phase 2: Frequency of adverse events (AE) 2. Phase 1b and Phase 2: Frequency of clinical laboratory abnormalities 3. Phase 1b: Objective Response (OR)

2.2 Background & Rationale

The purpose of this study is to learn about the effects of two study medicines (maplirpacept \[PF-07901801\] and glofitamab) when given together for the treatment of diffuse large B-cell lymphoma (DLBCL) that is relapsed or is refractory. Relapsed means has returned after last treatment. Refractory means that it has not responded to last treatment. The two study medicines are given after a single dose of obinutuzumab which is the third study medicine.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, ACTIVE_NOT_RECRUITING	Phase: PHASE1, PHASE2,	Status:
Target N:	24		

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

- * Histologically confirmed diagnosis of DLBCL
- * Relapsed or refractory disease
- * Participant is not be a candidate for or is unwilling to undergo high dose chemotherapy and subsequent stem cell transplant and/or is unable to receive chimeric antigen receptor (CAR) T-cell therapy
- * Previous treatment with at least two prior lines of systemic therapy (for phase 2, at least 2 and no more than 4 prior lines of systemic therapy). Prior therapy must include an anti-CD20 antibody.
- * Adequate bone marrow, hepatic and renal function
- * Eastern Cooperative Oncology Group (ECOG) ?2

Key Exclusion Criteria:

- * Prior treatment with anti-CD47 and/or prior glofitamab or anti-CD20 x CD3 containing regimen. Refractoriness to an obinutuzumab monotherapy containing regimen.
- * Prior allogeneic stem cell transplantation or autologous stem cell transplantation within 12 weeks prior to enrolment
- * High Grade B-Cell Lymphoma
- * Known active bacterial, viral, fungal, mycobacterial, parasitic, or other infection.

4.2 Exclusion Criteria

- * Prior treatment with anti-CD47 and/or prior glofitamab or anti-CD20 x CD3 containing regimen. Refractoriness to an obinutuzumab monotherapy containing regimen.
- * Prior allogeneic stem cell transplantation or autologous stem cell transplantation within 12 weeks prior to enrolment
- * High Grade B-Cell Lymphoma
- * Known active bacterial, viral, fungal, mycobacterial, parasitic, or other infection.

11. Study Identifiers & Governance

Primary ID:	962057060083113980
Registry Number:	NCT05896163
Sponsor:	Pfizer
Study Title:	A Study to Learn About the Effects of Two Study Medicines (Maplirpacept [PF-07901801] And Glofitamab) When Given Together In People With Relapsed Or Refractory Diffuse Large B Cell Lymphoma.
