

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Real-world Utilization Patterns, Clinical Outcomes, and HCRU in Lower-risk MDS Patients Treated With Luspatercept: A Multinational Medical Record Review Study
Short Title:	A Study to Evaluate Treatment Patterns, Outcomes, and Healthcare Resource Utilization in Patients With Lower-Risk Myelodysplastic Syndromes Treated With Luspatercept
Protocol Number:	1046382081401408161
NCT Number:	NCT07075406
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	luspatercept
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Participant baseline demographics 2. Participant baseline clinical characteristics 3. Participant treatment history
Secondary Obj.:	1. Number of participants receiving myelodysplastic syndromes (MDS) -directed treatment modalities 2. Systemic therapy agent or combination of agents received by participants 3. Treating clinicians' rationale for prescribing treatment(s)

2.2 Background & Rationale

The purpose of this study is to understand the treatment use of luspatercept in adults diagnosed with lower-risk myelodysplastic syndromes

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: COMPLETED
Target N:	250

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Confirmed diagnosis of primary myelodysplastic syndromes (MDS) with lower-risk status as measured by the International Prognostic Scoring System (IPSS) or the Revised International Prognostic Scoring System (IPSS-R) at the time of diagnosis

* IPSS risk level: low, intermediate-1 (level-1 risk)

* IPSS-R risk level: very low, low, intermediate

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Initiated luspatercept for treatment of Lower-Risk (LR)-MDS after the initial availability in each country of interest
 - * US: after April 2020
 - * Germany: after June 2020
 - * Spain: after June 2020
 - * France: after June 202
 - * Canada: after February 2021
- * The participant has a potential follow-up of at least 6 months from the index date (except death)
- * The participant is aged 18 years or older at the index date
- * The participant has a complete medical record or history for at least 12 months before the index date (or up to the date of initial LR-MDS diagnosis if duration between initial diagnosis and index date is less than 12 months)

4.2 Exclusion Criteria

- * Received luspatercept as part of a clinical trial
- * The participant has evidence of other malignant neoplasms prior to diagnosis of MDS, except disease free for ? 5 years at time of MDS diagnosis, basal or squamous cell carcinoma of the skin, carcinoma in situ of the cervix, carcinoma in situ of the breast, or incidental histologic finding of prostate cancer (stage T1a or T1b)
- * The participant has a history of Acute Myeloid Leukemia prior to MDS diagnosis
- * The participant has participated in clinical trials for specific treatments related to treatment of MDS

11. Study Identifiers & Governance

Primary ID: 1046382081401408161

Registry Number: NCT07075406

Sponsor: Bristol Myers Squibb

Study Title: A Study to Evaluate Treatment Patterns, Outcomes, and Healthcare Resource Utilization in Patients With Lower-Risk Myelodysplastic Syndromes Treated With Luspatercept

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____

Lead Statistician: _____ Date: _____
