

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Not Provided
Short Title:	Long-Term Outcomes With Abatacept In Biologic Treatment-Naive Rheumatoid Arthritis Patients In Japanese Clinical Practice Settings
Protocol Number:	293496331050572358
NCT Number:	NCT02758769
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	abatacept
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of achievement in simplified disease activity index (SDAI) remission after administration of abatacept
Secondary Obj.:	1. Percentage of achievement in low disease activity by simplified disease activity index (SDAI). 2. Change in the percentage of disease activity category by simplified disease activity index(SDAI) 3. Change in the percentage of disease activity category by clinical disease activity index(CDAI)

2.2 Background & Rationale

The purpose of this study is to examine the effectiveness and safety of the abatacept administration in biologic-naïve rheumatoid arthritis patients who have moderate disease activity despite treatments with conventional synthetic disease modified anti-rheumatic drugs.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: COMPLETED
Target N:	303

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Patients with RA who meet the 2010 American College of Rheumatology / European League against Rheumatism (ACR/EULAR) RA Classification Criteria
- * Patients with RA with a moderate disease activity (SDAI: ≥ 11 and ≤ 26)
- * Biologic-naïve patients with treatment history csDMARDs
- * Patients who meet the following criteria by hematological examination:

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Peripheral white blood cell count: 4,000/mm³
- * Peripheral lymphocyte count: 1,000/mm³
- * Blood β -D-glucan negative
- * Patients who understand the investigator's explanation of study procedures and have given voluntary written consent to participate in this study
- * Patients initiated with abatacept at per their physician's therapeutic decision

4.2 Exclusion Criteria

- * Past history of hypersensitivity to the components of the abatacept preparation
- * Disease complications from a comorbidity
- * Active infectious disease
- * Been judged by the investigator or the co-investigator as being inappropriate

Other protocol defined inclusion/exclusion criteria could apply

11. Study Identifiers & Governance

Primary ID: 293496331050572358

Registry Number: NCT02758769

Sponsor: Bristol Myers Squibb

Study Title: Long-Term Outcomes With Abatacept In Biologic Treatment-Naive Rheumatoid Arthritis Patients In Japanese Clinical Practice Settings

15. Sign-off & Approval
