

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Not Provided
Short Title:	Patient Characteristics, Treatment Patterns and Outcomes of Patients With Severe Asthma Treated With Tezepelumab in the Real World; a Retrospective, Observational Medical Chart Review Conducted in UK Severe Asthma Centres
Protocol Number:	444840344075762326
NCT Number:	NCT06455462
Sponsor Name:	AstraZeneca
Investigational Product:	tezepelumab
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Annualised exacerbation rate
Secondary Obj.:	1. Exacerbation rate during the baseline 2. Change from baseline in annual exacerbation rate 3. Exacerbation rate by season

2.2 Background & Rationale

This is a retrospective, observational chart review that will include patients with severe asthma (SA) who have participated in the tezepelumab patient access programme (TPAP). Electronic case report forms (eCRFs) will be used for data abstraction of clinical information from the health records of patients enrolled in the TPAP from up to eleven NHS trusts.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	350

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Patients who received their first dose of tezepelumab between 1st January 2023 and 19th July 2023 (TPAP cohort) or between 20th July 2023 and 31st March 2024 (post-TPAP cohort)
- * Patients aged ≥18 years at index

4.2 Exclusion Criteria

- * Patients who received any biologic drug for the treatment of asthma in a clinical trial at any time during the 52 weeks prior to the index date.
