

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A PHASE 1A/B OPEN-LABEL MASTER STUDY OF PF-07799544 AS A SINGLE-AGENT AND IN COMBINATION WITH OTHER TARGETED AGENTS IN PARTICIPANTS WITH ADVANCED SOLID TUMORS
Short Title:	A Study to Learn About the Study Medicine Called PF-07799544 in People With Advanced Solid Tumors
Protocol Number:	864289163785268282
NCT Number:	NCT05538130
Sponsor Name:	Pfizer
Investigational Product:	encorafenib
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with dose limiting toxicities (DLTs) Phase 1a monotherapy and Phase 1b combination therapy dose escalation: DLTs will be evaluated during the first cycle (21 days) as a single agent (phase 1a monotherapy) or in combination with other agents (phase 1b dose escalation) 2. Overall response rate (ORR) (phase 1b expansion): Response will be evaluated via radiographical tumor assessments by Response Evaluation Criteria in Solid Tumors version 1.1 (RECIST v1.1) 3. Number of participants with treatment-emergent adverse events (AEs) (phase 1a and 1b dose escalation phases): AEs as characterized by type, frequency, severity, timing, seriousness, and relationship to study therapy
Secondary Obj.:	1. Number of participants with treatment-emergent adverse events (AEs) 2. Number of participants with clinically significant change from baseline in laboratory abnormalities 3. Number of participants with clinically significant change from baseline in vital sign abnormalities

2.2 Background & Rationale

The purpose of this clinical trial is to learn the safety and effects of the study medicine (PF-07799544) administered as a single agent and in combination with other study medications in people with solid tumors. This study is seeking participants who have an advanced solid tumor for which the available treatments are no longer effective in controlling their cancer. All participants in this study will receive PF-07799544. PF-07799544 comes as a tablet to take by mouth daily (initially 2 times per day, but this could change to once daily or another frequency). Depending on the part of the study, participants may also receive another study medicine.

3. Study Design & Methodology

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Design Framework: Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING
Target N: 124

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Diagnosis of advanced/metastatic solid tumor including primary brain tumor for monotherapy phase 1a dose escalation
- * Disease progressed during/following last prior treatment and no satisfactory alternative treatment options for monotherapy phase 1a dose escalation
- * For Substudy B, histological or cytological diagnosis of advanced/metastatic melanoma
- * For Substudy C, unresectable or adv/metastatic solid tumor progressed on, or with demonstrated intolerance to SOC, excluding melanoma,
- * For Substudy B and C, measurable disease by RECIST version 1.1
- * For Substudy B, evidence of a BRAF V600 mutation or BRAF Class II/III alteration in tumor tissue and/or blood
- * For Substudy C, evidence of a BRAF founder alteration (non-V600 Class II/III BRAF alteration)

4.2 Exclusion Criteria

- * Brain metastasis larger than 4 cm
- * History or current evidence of retinal vein occlusion (RVO) or concurrent neuromuscular disorder associated with elevated creatine kinase (CK)

11. Study Identifiers & Governance

Primary ID: 864289163785268282
Registry Number: NCT05538130
Sponsor: Pfizer
Study Title: A Study to Learn About the Study Medicine Called PF-07799544 in People With Advanced Solid Tumors

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
