

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Real-World Treatment Patterns and Outcomes of Luspatercept in Patients With Lower-risk Myelodysplastic Syndromes (LR-MDS) in China ('REACH' Study)
Short Title:	Treatment Patterns and Outcomes in Patients With Lower-risk Myelodysplastic Syndromes Treated With Luspatercept in China
Protocol Number:	866882088164425056
NCT Number:	NCT07073690
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	luspatercept
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Participant red blood cell transfusion independence 2. Participants mean hemoglobin (Hb) increase $\geq$ 1.5 g/dL
Secondary Obj.:	1. Participant transfusion independence and increase in hemoglobin (Hb) 2. Duration of luspatercept monotherapy treatment 3. Health Care Resource Utilization (HCRU)

2.2 Background & Rationale

The purpose of this study is to evaluate the treatment patterns and clinical outcomes in adults with lower-risk MDS (LR-MDS) who were erythropoiesis-stimulating agents (ESA)-naïve and received luspatercept treatment in China

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: ACTIVE_NOT_RECRUITING
Target N:	80

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participants $\geq$ 18 years of age.
- * Documented diagnosis of no del(5q) MDS that meets lower-risk Myelodysplastic Syndromes (MDS) classification. (Diagnosis criteria and risk classification criteria are based on clinical practice)
- * Patients who were erythropoiesis-stimulating agent (ESA)-naïve have received luspatercept monotherapy at least 2 cycles regardless of RS status.
- * Historical documentation of anemia before luspatercept treatment.

4.2 Exclusion Criteria

- * Had a history of acute myeloid leukemia (AML) prior to MDS diagnosis.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Received stem cell transplant prior to luspatercept treatment initiation.

11. Study Identifiers & Governance

Primary ID: 866882088164425056

Registry Number: NCT07073690

Sponsor: Bristol Myers Squibb

Study Title: Treatment Patterns and Outcomes in Patients With Lower-risk Myelodysplastic Syndromes Treated With Luspatercept in China

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
