

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Single-arm, Multi-center Study of Ruxolitinib for the Treatment of Chinese Patients With Grade II-IV Corticosteroid-refractory Acute Graft Versus Host Disease
Short Title:	Study of Efficacy and Safety of Ruxolitinib in Patients With Grade II to IV Steroid-refractory Acute Graft vs. Host Disease
Protocol Number:	370327200008168017
NCT Number:	NCT06462469
Sponsor Name:	Novartis
Investigational Product:	ruxolitinib
Phase:	PHASE4
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Overall Response Rate (ORR) at Day 28 per Investigators: The ORR at Day 28 defined as the percentage of participants demonstrating a complete response (CR) or partial response (PR) without requirement for additional systemic therapies for an earlier progression, mixed response or nonresponse, according to standard criteria and assessed by investigators.
Secondary Obj.:	1. Durable Overall response rate (ORR) at Day 56 2. Duration of Response (DOR) 3. Best overall response (BOR)

2.2 Background & Rationale

The purpose of this study is to assess the efficacy and safety of ruxolitinib therapy in Chinese adults and adolescents (? 12 years old) with Grade II-IV steroid-refractory acute graft versus host disease (SR-aGvHD).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE4, Status: RECRUITING
Target N:	54

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026
