

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase III Randomized, Open-Label Study Evaluating Efficacy and Safety of Giredestrant Compared With Fulvestrant, Both Combined With a CDK4/6 Inhibitor, in Patients With Estrogen Receptor-Positive, HER2-Negative Advanced Breast Cancer With Resistance to Prior Adjuvant Endocrine Therapy
Short Title:	A Study to Evaluate Efficacy and Safety of Giredestrant Compared With Fulvestrant (Plus a CDK4/6 Inhibitor), in Participants With ER-Positive, HER2-Negative Advanced Breast Cancer Resistant to Adjuvant Endocrine Therapy (pionERA Breast Cancer)
Protocol Number:	392401503807185904
NCT Number:	NCT06065748
Sponsor Name:	Roche
Investigational Product:	fulvestrant
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression-Free Survival (PFS) in the ESR1 mutation (ESR1m) Subgroup: PFS is defined as the time from randomization to the first occurrence of PD, as determined by the investigator according to Response Evaluation Criteria in Solid Tumors Version 1.1 (RECIST v1.1), or death from any cause during the study. 2. PFS in the Full Analysis Set (FAS) Population
Secondary Obj.:	1. PFS in the ESR1 no-mutation-detected (ESR1nmd) Subgroup 2. Overall Survival (OS) 3. Confirmed Objective Response Rate (cORR)

2.2 Background & Rationale

This is a Phase III, randomized, open-label multicenter study that will evaluate the efficacy and safety of giredestrant compared with fulvestrant, both in combination with the investigator's choice of a CDK4/6 inhibitor (palbociclib, ribociclib or abemaciclib), in participants with estrogen receptor-positive (ER+), human epidermal growth factor receptor 2-negative (HER2-) advanced breast cancer who have developed resistance to adjuvant endocrine therapy.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	1050

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Locally advanced or metastatic adenocarcinoma of the breast, not amenable to treatment with curative intent
- * Documented estrogen receptor-positive (ER+), HER2-negative (HER2-) tumor assessed locally on the most recent tumor biopsy (or an archived tumor sample if a recent tumor sample is not available for testing)
- * Confirmed ESR1 mutation status (ESR1m versus ESR1nmd) in baseline circulating tumor DNA (ctDNA) through central laboratory testing
- * Resistance to prior adjuvant endocrine therapy (ET), which is defined as having relapsed with prior standard adjuvant ET, on-treatment after ≥ 12 months or off-treatment within 12 months of completion. Prior use of adjuvant CDK4/6i is allowed (if relapse occurred ≥ 12 months since completion).
- * No prior systemic anti-cancer therapy for advanced disease
- * Measurable disease as defined per RECIST v.1.1 or non-measurable (including bone-only) disease
- * Eastern Cooperative Oncology Group Performance Status (ECOG PS) 0-1
- * For pre/perimenopausal women and for men: willing to undergo and maintain treatment with approved LHRH agonist therapy (as per local guidelines) for the duration of study treatment

4.2 Exclusion Criteria

- * Prior systemic therapy (e.g., prior chemotherapy, immunotherapy, or biologic therapy) for locally advanced unresectable or metastatic breast cancer
- * Prior treatment with another SERD (e.g., fulvestrant, oral SERDs) or novel ER-targeting agents
- * Advanced, symptomatic, visceral spread that is at risk of life-threatening complications in the short term
- * Active cardiac disease or history of cardiac dysfunction
- * Clinically significant history of liver disease

11. Study Identifiers & Governance

Primary ID: 392401503807185904

Registry Number: NCT06065748

Sponsor: Roche

Study Title: A Study to Evaluate Efficacy and Safety of Giredestrant Compared With Fulvestrant (Plus a CDK4/6 Inhibitor), in Participants With ER-Positive, HER2-Negative Advanced Breast Cancer Resistant to Adjuvant Endocrine Therapy (pionERA Breast Cancer)

15. Sign-off & Approval
