2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: 1. Percentage of Participants Achieving Dermatology Life Quality Index (DLQI) Score of 0 or 1 at Week 16: Dermatology Life Quality Index (DLQI) is a participant-reported Quality of Life (QoL) survey which consists of 10 questions concerning symptoms and feelings, daily activities, leisure, work, school, personal relationships, and treatment during the last week. Each question is scored on a 4-point scale:

Secondary Obj.: 1. Percentage of Participants Achieving a ? 4-point Reduction From Baseline in Dermatology Life Quality Index (DLQI) at Week 16 2. Change From Baseline in Whole-body Itch Numerical Rating Scale (NRS) Score at Week 16 3. Percentage of Participants With a Static Physician's Global Assessment (s-PGA) Score of 0 (Clear) or 1 (Almost Clear) With at Least a 2-point Reduction From Baseline at Week 16

2.2 Background & Rationale
