

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A 12-month, Prospective, Multi-center Post-authorization Commitment (PAC) Study Monitoring Safety in Adult Patients With Relapsing-remitting Multiple Sclerosis Newly Initiated on Gilenya (Fingolimod) in Taiwan (SPRING)
Short Title:	Safety and Efficacy Study of Fingolimod in Taiwanese Adults (? 20years) With Relapsing Remitting Multiple Sclerosis
Protocol Number:	93877243089510820
NCT Number:	NCT04480853
Sponsor Name:	Novartis
Investigational Product:	fingolimod
Phase:	PHASE4
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Adverse Events of Special Interest(AESI): The adverse events of special interest (AESI) include bradycardia and Grade 2 or higher AV block during First Dose Observation. 2. Number of Adverse Events of Special Interest (AESI): The adverse events of special interest (AESI) include macular edema, abnormal liver function(ALT, AST or GGT $\geq$ 5x upper normal limit), and severe lymphocytopenia(lymphocyte $<$ 200 cells/ μ L).
Secondary Obj.:	1. Annualized relapse reate (ARR) 2. Change from baseline of Pulse (beats/min) 3. Change from baseline of blood pressure (mmHg)

2.2 Background & Rationale

The purpose of the study is to describe the safety profile of fingolimod in the Taiwanese multiple sclerosis population. This study aims to collect the safety data in patients newly initiated on fingolimod for one year.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE4, Status: RECRUITING
Target N:	30

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

-Patients with relapsing-remitting multiple sclerosis that are fingolimod treatment naive at the time of study entry and are newly starting fingolimod based on physician judgement and according to Taiwan's fingolimod package insert (version TWI-090420)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.2 Exclusion Criteria

- * Patients with the diagnosis of neuromyelitis optica.
- * Patients who are being treated with any investigational drug at the time of study entry.
- * In the last 6 months experienced myocardial infarction, unstable angina, stroke, transient ischemic attack, decompensated heart failure requiring hospitalization or Class III/IV heart failure
- * A history or presence of Mobitz Type II second-degree or third-degree atrioventricular block or sick sinus syndrome, unless patient has a functioning pacemaker
- * A baseline QTc interval $\geq$ 500 msec
- * Cardiac arrhythmias requiring anti-arrhythmic treatment with Class Ia or Class III anti-arrhythmic drugs
- * Patient with known immune deficiency, increased risk of opportunistic infection, severe active infection or chronic active infection.
- * Patients with severe active malignancies, except for basal cell epithelioma
- * Patients with severe hepatic insufficiency
- * Pregnant or nursing (lactating) women or women of childbearing potential unless on contraception

11. Study Identifiers & Governance

Primary ID: 93877243089510820

Registry Number: NCT04480853

Sponsor: Novartis

Study Title: Safety and Efficacy Study of Fingolimod in Taiwanese Adults ($\geq$ 20years) With Relapsing Remitting Multiple Sclerosis

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____

Lead Statistician: _____ Date: _____
