

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase III, Randomized, Double-Blind, Placebo-Controlled, Multicenter Study to Evaluate the Efficacy and Safety of Obinutuzumab in Patients With ISN/RPS 2003 Class III or IV Lupus Nephritis
Short Title:	A Study to Evaluate the Efficacy and Safety of Obinutuzumab in Participants With ISN/RPS 2003 Class III or IV Lupus Nephritis
Protocol Number:	1018938339259208571
NCT Number:	NCT04221477
Sponsor Name:	Roche
Investigational Product:	caffeine
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of Participants With Complete Renal Response (CRR): CRR was defined as an achievement of all the following criteria: urinary protein-to-creatinine ratio (UPCR) ≤ 0.5 gram/gram (g/g); estimated glomerular filtration rate (eGFR) $\geq 85\%$ of baseline, as calculated using the chronic kidney disease epidemiology collaboration (CKD-EPI) equation and no occurrence of intercurrent events of rescue therapy, treatment failure, death or early study withdrawal. Obinutuzumab and placebo were compared using Cochran-Mantel-Haenszel (CMH) test adjusting for the stratification factors region and race. Missing data was imputed by multiple imputations using fully conditional specification (FCS) predicted mean matching method. Percentage have been rounded off.
Secondary Obj.:	1. Percentage of Participants Who Achieve CRR With Successful Prednisone Taper at Week 76 2. Percentage of Participants Who Achieve a Proteinuric Response 3. Mean Change in eGFR

2.2 Background & Rationale

This study will evaluate the efficacy, safety, and pharmacokinetics of obinutuzumab compared with placebo in participants with International Society of Nephrology/Renal Pathology Society (ISN/RPS) 2003 class III or IV lupus nephritis (LN) when added on to standard-of-care therapy consisting of mycophenolate mofetil (MMF) and corticosteroids.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	271

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Diagnosis of active or active/chronic ISN/RPS 2003 Class III or IV proliferative LN as evidenced by renal biopsy performed within 6 months. Participants may co-exhibit Class V disease in addition to either Class III or Class IV disease
- * Urine protein to creatinine ratio greater than or equal to ($\geq$) 1 on a 24-hour collection
- * Other inclusion criteria may apply

Key Exclusion Criteria:

- * Pregnancy or breastfeeding
- * Severe renal impairment or the need for dialysis or renal transplantation
- * Receipt of an excluded therapy, including any anti-CD20 therapy less than 9 months prior to screening or during screening; or cyclophosphamide, tacrolimus, ciclosporin, or voclosporin during the 2 months prior to screening or during screening
- * Significant or uncontrolled medical disease which, in the investigator's opinion, would preclude participant participation
- * Known active infection of any kind or recent major episode of infection
- * Intolerance or contraindication to study therapies
- * Other exclusion criteria may apply

4.2 Exclusion Criteria

- * Pregnancy or breastfeeding
- * Severe renal impairment or the need for dialysis or renal transplantation
- * Receipt of an excluded therapy, including any anti-CD20 therapy less than 9 months prior to screening or during screening; or cyclophosphamide, tacrolimus, ciclosporin, or voclosporin during the 2 months prior to screening or during screening
- * Significant or uncontrolled medical disease which, in the investigator's opinion, would preclude participant participation
- * Known active infection of any kind or recent major episode of infection
- * Intolerance or contraindication to study therapies
- * Other exclusion criteria may apply

11. Study Identifiers & Governance

Primary ID:	1018938339259208571
Registry Number:	NCT04221477
Sponsor:	Roche
Study Title:	A Study to Evaluate the Efficacy and Safety of Obinutuzumab in Participants With ISN/RPS 2003 Class III or IV Lupus Nephritis

15. Sign-off & Approval
