2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression Free Survival (PFS) by BICR: Time from the date of randomization to the date of the first documentation of objective progressive disease as determined by blinded independent central review (BICR) per RECIST v1.1, or death due to any cause, whichever occurs first
Secondary Obj.:	1. Overall Survival (OS) 2. Progression Free Survival (PFS) by Investigator 3. OR by BICR and by investigator

2.2 Background & Rationale

The purpose of this study is to determine the safety and efficacy of PF-07220060 with letrozole compared to approved treatments (ie, palbociclib, ribociclib or abemaciclib with letrozole) in people with breast cancer:
