2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Overall survival (OS), defined as the time from randomization to date of death from any cause
Secondary Obj.:	1. Progression-free survival (PFS), defined as the time from randomization to the first occurrence of disease progression or death from any cause, whichever occurs first, as determined by the Independent Review Committee (IRC) 2. PFS, defined as the time from randomization to the first occurrence of disease progression or death from any cause, whichever occurs first, as determined by the investigator 3. Complete response (CR) rate, defined as the proportion of patients whose best overall response is a CR on positron emission tomography/computed tomography (PET/CT) during the study, as determined by the IRC

2.2 Background & Rationale

This study will evaluate the efficacy and safety of glofitamab in combination with gemcitabine plus oxaliplatin (Glofit-GemOx) compared with rituximab in combination with gemcitabine plus oxaliplatin (R-GemOx) in patients with R/R DLBCL.
