

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                                  |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Phase 4, Multicenter, Randomized, Double-Blind, Placebo-Controlled Study to Evaluate the Efficacy and Safety of Deucravacitinib in Participants With Non-Pustular PalmoPlantar and Genital Psoriasis (Psoriatyk Special Sites) |
| Short Title:             | A Study to Evaluate Effectiveness and Safety of Deucravacitinib in Participants With Non-Pustular Palmoplanter and Genital Psoriasis                                                                                             |
| Protocol Number:         | 505403582008611403                                                                                                                                                                                                               |
| NCT Number:              | NCT06042920                                                                                                                                                                                                                      |
| Sponsor Name:            | Bristol Myers Squibb                                                                                                                                                                                                             |
| Investigational Product: | deucravacitinib                                                                                                                                                                                                                  |
| Phase:                   | PHASE4                                                                                                                                                                                                                           |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                                        |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Number of Participants With a 75% Improvement in Palmoplanter Psoriasis Area and Severity Index (pp-PASI-75) Score 2. Number of Participants With Static Physician Global Assessment Genitals (s-PGA-G) Score of 0 (Clear ) or 1 (Almost Clear), With At Least a 2-Point Reduction                                                                                                                  |
| Secondary Obj.:    | 1. Number of Participants With Palmoplanter Physician Global Assessment (pp-PGA) Score of 0 (Clear) or 1 (Almost Clear), With At Least a 2-Point Reduction 2. Number of Participants With Static Physician Global Assessment (s-PGA) Score of 0 (Clear) or 1 (Almost Clear), With Least a 2-Point Reduction 3. Change from baseline in Genital Psoriasis (GenPs) Itch Numeric Rating Scale (NRS) score |

### 2.2 Background & Rationale

The purpose of this study is to measure the safety and effectiveness of deucravatinib in participants with non-pustular palmoplanter psoriasis and genital psoriasis.

## 3. Study Design & Methodology

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE4, Status: TERMINATED |
| Target N:         | 130                                                     |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Inclusion Criteria for Non-Pustular Palmoplanter Psoriasis

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- \* Men and women diagnosed with stable plaque psoriasis with involvement of the palm(s) and/or sole(s) for at least 6 months or more. Stable psoriasis is defined as no morphology changes or significant flares of disease activity in the opinion of the investigator.
- \* Moderate-to-severe plaque psoriasis defined as s-PGA score of  $\geq 3$  on a 5-point scale at both screening visit and Day 1.
- \* Moderate-to-severe non-pustular PP psoriasis, defined as pp-PGA score of  $\geq 3$  on a 5-point scale and pp-PASI  $\geq 8$  at both screening visit and Day 1.
- \* A total maximum of 5 sterile pustules across both palms and soles limited only to psoriatic plaques will be allowed.
- \* Evidence of typical plaque psoriasis outside palms and soles at both screening visit and Day 1.
- \* Deemed by the investigator to be a candidate for phototherapy or systemic therapy.
- \* Failed to respond to, or intolerant of  $\geq 1$  topical therapy.

## Inclusion Criteria for Genital Psoriasis

- \* Men and women diagnosed with stable plaque psoriasis with involvement of the genital area for at least 6 months or more. Stable psoriasis is defined as no morphology changes or significant flares of disease activity in the opinion of the investigator.
- \* Moderate-to-severe plaque psoriasis defined as s-PGA score of  $\geq 3$  on a 5-point scale at both screening visit and Day 1.
- \* Moderate-to-severe GenPs, defined as static Physician's Global Assessment of Genitalia (s-PGA-G) score of  $\geq 3$  on a 6-point scale at both screening visit and Day 1.
- \* Evidence of typical plaque psoriasis in a non-genital area at both screening visit and Day 1.
- \* Deemed by the investigator to be a candidate for phototherapy or systemic therapy.
- \* Failed to respond to, or intolerant of  $\geq 1$  topical therapy.

## Key Exclusion Criteria:

### Target Disease Exceptions

- \* Has non-plaque psoriasis (for PP pustulosis, PP pustular psoriasis, isolated pustules on palms or soles with or without erythema outside psoriatic plaques, guttate, pustular, erythrodermic, and drug-induced psoriasis) at screening or Day 1.

Other protocol-defined inclusion/exclusion criteria apply.

## 4.2 Exclusion Criteria

### Target Disease Exceptions

- \* Has non-plaque psoriasis (for PP pustulosis, PP pustular psoriasis, isolated pustules on palms or soles with or without erythema outside psoriatic plaques, guttate, pustular, erythrodermic, and drug-induced psoriasis) at screening or Day 1.

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Other protocol-defined inclusion/exclusion criteria apply.

## 11. Study Identifiers & Governance

**Primary ID:** 505403582008611403  
**Registry Number:** NCT06042920  
**Sponsor:** Bristol Myers Squibb  
**Study Title:** A Study to Evaluate Effectiveness and Safety of Deucravacitinib in Participants With Non-Pustular Palmoplantar and Genital Psoriasis

## 15. Sign-off & Approval
